and that they were of great significance for Kierkegaard despite his well-known disappointment with them.<sup>4</sup>

But this claim ignores the fact that, in addition to Schelling's lectures, Kierkegaard at the same time also attended the less celebrated lectures of the Hegelian theologian, Philipp Marheineke (1780–1846) and the Hegelian logician, Karl Werder (1806–93). Kierkegaard's notes to Marheineke's lectures are quite extensive, and their detail suggests that he was profoundly interested in the content.<sup>5</sup> Although his notes from Werder's lectures are less copious, these lectures were also, I wish to argue, important for him.<sup>6</sup> In addition, Kierkegaard owned a copy of Werder's *Logik: Als Kommentar und Ergänzung zu Hegels Wissenschaft der Logik*,<sup>7</sup> upon which the lectures were apparently in large part based. In any case, the fact that he was so anxious to learn from these two Hegelians clearly undermines the claim that his primary goal in Berlin was to find new critical tools with which to attack Hegel.

Most readers of Kierkegaard are familiar with his, at times almost formulative, criticisms of Hegel's speculative logic.<sup>8</sup> In later writings he criticizes readers who barely know Schelling's name have come to take for granted as historically accurate his playful caricature of Hegel" (*ibid.*, p. 290). ## THE INFLUENCE OF WERDER'S LECTURES AND LOGIK ON KIERKEGAARD'S THOUGHT

Jon Stewart

The story has often been told of Kierkegaard's trip to Berlin in the fall of 1841. His stay in the Prussian capital lasted from October 25, 1841, to March 6, 1842. It has traditionally been assumed that the trip was motivated by his desire to attend the lectures of Schelling (1775–1854). By that time near the end of a long and distinguished academic career, Schelling had been appointed to the University of Berlin in 1841 by King Friedrich Wilhelm IV of Prussia (1795–1861) for the express purpose of extinguishing the dangerous spark of Hegelianism before it caught fire and spread.<sup>1</sup> In the letter to Schelling offering him a prestigious professorship at the university, the King's representative Karl Freiherr von Bunsen (1791–1860) makes reference to the King's desire to marshal Schelling's intellectual power and reputation into service against "the dragon seed of Hegelian pantheism."<sup>2</sup> Since Schelling's lectures were often highly critical of Hegel, it is often claimed that one of Kierkegaard's main motivations for attending them was to obtain new weapons for his anti-Hegelian arsenal.<sup>3</sup>

1. See Max Lenz, *Geschichte der Königlichen Friedrich-Wilhelms-Universität zu Berlin*, vols. 1–2, Halle: Verlag der Buchhandlung des Waisenhauses 1910–18, vol. 2.2, pp. 9ff.

2. See F.W.J. Schelling, *Philosophie der Offenbarung 1841–42*, ed. by Manfred Frank, Frankfurt am Main: Suhrkamp [1977] third revised edition, 1993. Anhang II: "Historische Hintergründe der Berufung Schellings; Schellings Aufstreiten in Berlin 1841," p. 486. See also Kuno Fischer, *Schellings Leben, Werke und Lehre*, Heidelberg 1899, p. 239.

3. For example, Kaufmann: "Kierkegaard's attacks were not based on his own reading of Hegel and were usually as wide of the mark as his remarks about Goethe. His image of Hegel was derived from the lectures of the old Schelling who had developed a profound resentment when Hegel's fame eclipsed his own." Walter Kaufmann, *Hegel: A Reinterpretation*, Notre Dame:

ticizes, for example, the principle of mediation,<sup>9</sup> the idea of movement in logic,<sup>10</sup> the presuppositionless beginning,<sup>11</sup> dialectical transitions from category to category,<sup>12</sup> the pretension of Absolute Knowing,<sup>13</sup> the unity of being and thought,<sup>14</sup> and the speculative critique of the Aristotelian laws of contradiction and excluded middle.<sup>15</sup> Given this apparently unambiguous negative assessment of Hegel's logic, it seems somewhat odd that, when in Berlin, Kierkegaard would be interested in attending lectures on Hegel's logic by a Hegelian logician. Niels Thulstrup suggests that Kierkegaard's notes from Werder's lectures are critical in nature and thus evidence an anti-Hegelianism.<sup>16</sup> Thulstrup's view seems to be that while Kierkegaard had not yet fully developed his objections to Hegelian logic at this point, they are nonetheless already present implicitly in his lecture notes to Werder's course. But neither the tone nor the content of the actual notes supports Thulstrup's position. In this article I will argue, contrary to Thulstrup, that Kierkegaard's comments concerning Werder's logic are generally uncritical and offer no evidence to support the position that Kierkegaard was an anti-Hegelian at the time of their writing. Further, there are a number of quite startling and surprising points of influence of the relatively unknown Werder on Kierkegaard.

The familiar objections of Kierkegaard against Hegel's logic in the *Postscript* and elsewhere, that he developed after he had studied Trendelenburg and Aristotle, he did not yet set forth in detail; but the tendency in the entries noted here is the same as later."

## I. Werder and the German Hegelians

Karl Friedrich Werder was born in Berlin on December 13, 1806.<sup>17</sup> He studied philosophy under Hegel in the late 1820s during the period of Hegel's greatest influence. He was presumably in attendance at one or more of the lecture courses on logic that Hegel gave every summer semester in Berlin from 1819 to 1831.<sup>18</sup> In 1834, i.e., three years after Hegel's death, Werder completed his *Habilitationsschrift* with the title *De Platonis Parmenide*.<sup>19</sup> After that he held the position of *Privatdozent* at the University of Berlin, and in 1838 he became *außerordentlicher Professor*. He was never to attain the position of *ordinarius* due to unfavorable political conditions.<sup>20</sup>

Perhaps in part because he had no chance of advancing his career, Werder did not restrict his efforts to a narrow field of academic specialization. In addition to being a philosopher, he was also a dramatist and a critic. He wrote tragedies which never enjoyed more than moderate success. By contrast, he gave a series of highly popular lectures on the dramatic works of Shakespeare,<sup>21</sup> Schiller,<sup>22</sup> and Lessing<sup>23</sup> among others.

17. For Werder's life and career, see the following: Albert Käster, "Karl Friedrich Werder," in *Allgemeine Deutsche Biographie*, vols. 1–56, Berlin: Duncker & Humblot 1967–71. Neudruck der 1. Auflage (1875–1912), vol. 44, pp. 479–485. Max Lenz, *Geschichte der Königlichen Friedrich-Wilhelms-Universität zu Berlin*, op. cit., vol. 2.1, pp. 484f. Paul Schlenther, "Am Grabe des alten Werder," *Das Magazin für Literatur*, vol. 62, no. 16, 1893, pp. 249–253.

18. See Hans-Christian Lucas, "Hegel's Vorlesungen über Logik und Metaphysik. Mit besonderer Berücksichtigung der Berliner Zeit," *Hegel-Studien*, vol. 2, p. 33. See also "Übersicht über Hegels Berliner Vorlesungen," in Georg Wilhelm Friedrich Hegel, *Sämmtliche Werke*, Neue Kritische Ausgabe, vol. II, *Berliner Schriften*, ed. by Johannes Hoffmeister, Hamburg: Felix Meier 1956, pp. 743–749.

19. Karl Werder, *De Platonis Parmenide*, Berlin 1834. Werder also discusses the *Parmenides* in his *Logik*, pp. 92–96.

20. The Prussian Minister of Education, Karl Freiherr Stein zum Altenstein (1770–1840), had been well disposed towards Hegel's students and helped to advance their careers. However, his successor, the reactionary Johann Albrecht Friedrich Eichhorn (1799–1856) regarded Hegel's philosophy as a dangerous form of free-thinking. With Eichhorn's appointment, Werder's chances for advancement in the field of philosophy in effect disappeared. See Max Lenz, *Geschichte der Königlichen Friedrich-Wilhelms-Universität zu Berlin*, op. cit., vol. 2.2, pp. 8ff.

21. Karl Werder, *Vorlesungen über Shakespeare's Hamlet, gehalten an der Universität zu Berlin (zuerst im Wintersemester 1859–60, zuletzt 1871–72)*, Berlin 1875 (2nd edition 1893). West 1976.) *Vorlesungen über Shakespeare's Macbeth gehalten an der Universität zu Berlin (zuerst im Winter 1860 als Skizze, dann ausgeführt und mehrmals wiederholt)*, Berlin 1885.

22. Karl Werder, *Vorlesungen über Schiller's Wallenstein gehalten an der Universität zu Berlin (zuerst im Winter 1860–61, und später wiederholt)*, Berlin 1889.

23. Karl Werder, *Vorlesungen über Lessings Nathan gehalten an der Universität zu Berlin (zu-*

A volume of lyric poems was published posthumously.<sup>24</sup> Werder lived a long life and ultimately died in his home city on April 3, 1893. Werder enjoyed a modest reputation among the German Hegelians but was by no means one of the leading figures. This can probably be explained by the varied nature of his output and the limited role that philosophy played in it, taken as a whole. His early work on Plato's *Parmenides* and his *Logik* were his only published works of philosophy. Further, despite his friendship with the Hegelians Eduard Gans (1798–1839) and Heinrich Gustav Hotho (1802–73), he was never a member of the inner circle of Hegel students as is evidenced, for example, by the fact that he was never a member of the prestigious editorial board of *Hegel's Werke*,<sup>25</sup> the first collected edition of Hegel's writings. Nor was he ever actively involved in the *Jahrbücher für wissenschaftliche Kritik*, the Hegel journal that began publication in Hegel's lifetime.<sup>26</sup>

In histories of Hegelianism, Werder is usually summarily treated with a single line.<sup>27</sup> He is mentioned briefly by, for example, Franz Anton Staudenmaier (1800–56),<sup>28</sup> Johann Eduard Erdmann (1805–92),<sup>29</sup> and Kuno

<sup>24</sup> Karl Werder's *Gedichte*, ed. by Otto Goldemeister, Berlin 1895.

<sup>25</sup> Georg Wilhelm Friedrich Hegel's *Werke: Vollständige Ausgabe*, vols. 1–18, ed. by Ludwig Bounemann, Friedrich Förster, Eduard Gans, Karl Hegel, Leopold von Henning, Heinrich Gustav Hotho, Philipp Marheineke, Karl Ludwig Michelet, Karl Rosenkranz, Johannes Schulze, Berlin 1832–45.

<sup>26</sup> See Karl Rosenkranz, Georg Wilhelm Friedrich Hegel's *Leben*, Berlin 1844, pp. 389–397.

<sup>27</sup> In Toews' standard work on Hegelianism, Werder is mentioned only fleetingly. John Edward Toews, *Hegelianism: The Path toward Dialectical Humanism, 1805–1841*, Cambridge: Cambridge University Press 1980, pp. 87, 216, 230, 357. See also the brief blurb in *Philosophen-Lexikon: Handwörterbuch der Philosophie nach Personen*, vols. 1–2, by Gertrud Jung and Werner Ziegensfuss, Berlin: Walter de Gruyter & Co. 1949–50, vol. 2, p. 858.

<sup>28</sup> Franz Anton Staudenmaier, *Darstellung und Kritik des Hegelschen Systems: Aus dem Standpunkt der christlichen Philosophie*, Mainz 1844, ASKB 789, p. 434: "In etwas dichterischer Weise hat ein Anhänger der Schule den obschwelbenden Gedanken von Sein und Nichts also vorsichtig zu machen gesucht: 'Im Nichts entthult sich der heilige Doppelsinn der Leerheit des Seins ... weil es das *nachte* Sein ist, der Geist des Seins, das Sein im Sein.' " Staudenmaier quotes from Werder's *Logik*, p. 41.

<sup>29</sup> Johann Eduard Erdmann, *Grundriss der Geschichte der Philosophie*, Zweiter und Letzter Band. *Philosophie der Neuzeit*, Vierte Auflage bearbeitete von Benno Erdmann, Berlin: Verlag von Wilhelm Hertz 1896, § 344–8, pp. 738f.: "K. Werder's (geboren 1806) *Logik*, die sich als Kommentar und Ergänzung zu Hegels Logik ankündigt (Berlin 1841), hat es bei der Lehre von der Qualität bewenden lassen, d.h. nur den neunten Teil der Logik gegeben." See also § 346, 15, p. 819: "Interessant ist es zu sehen, wie die Hegelische Philosophie modifiziert wird, wo sie, namentlich durch die akademischen Vorträge Werders und Michelers, zur Kenntnis denkender Polen kommt, in denen damals, mehr oder weniger, panslavistische Ideen sich zu regen begannen." (Erdmann refers to Cieszkowski and Trentowski in this context.)

Fischer (1824–1907).<sup>30</sup> From these accounts it seems that Werder amounts to little more than a footnote not just in the history of philosophy but even in the history of Hegelianism. His philosophical efforts seem to have been regarded with great reservation by at least some of his contemporaries involved in the debates surrounding Hegel's philosophy. This again evokes the question of what it was about Werder's lectures that interested Kierkegaard.

## II. Werder's Logik and Hegel's Works on Logic

To appreciate the significance and scope of Werder's *Logik*, it will be necessary to say a few words about Hegel's works on logic and their reception. Hegel's main statement on logic is of course his massive *Wissenschaft der Logik*, which was published in three successive volumes in 1812, 1813 and 1816. Each volume contains one "book" or main section: "The Doctrine of Being,"<sup>31</sup> "The Doctrine of Essence,"<sup>32</sup> and "The Doctrine of the Concept."<sup>33</sup> A second edition was planned, but Hegel managed to revise only "The Doctrine of Being" before his death on November 14, 1831. This revised text was included in the second edition, which was published in 1832.<sup>34</sup> This second edition was the text that was used when

the *Wissenschaft der Logik* was republished as a part of *Hegel's Werke*.<sup>35</sup> This text was edited by Leopold von Henning (1791–1866) and appeared in three volumes from 1834–35.<sup>36</sup> This was the text of Hegel's *Logik* that Kuno Fischer's *Geschichte der neuern Philosophie*, vols. 1–10, Heidelberg: Carl Winter's Universitätsbuchhandlung, Dritte Auflage 1898–1912.

<sup>30</sup> Kuno Fischer, *Hegels Leben, Werke und Lehre*, Erster Teil, Zweite Auflage, Heidelberg: Carl Winter's Universitätsbuchhandlung 1911, p. 152: "Karl Werder aus Berlin (1806–1893), der noch aus der unmittelbaren Schule Hegels hervorgegangen, aber erst einige Jahre nach dem Tode des Meisters als Dozent der Philosophie aufgetreten ist (Winter 1834), Philosoph und Dichter ... er hat anregende Vorlesungen über Logik gehalten, auch über den ersten Abschnitt der hegelschen Logik (Qualität) eine etwas phantastische Schrift herausgegeben (1841) ..." Vol. 8.1 pp. 9–38.

<sup>31</sup> I.e. "Die Lehre vom Seyn," *Jub.* 4, pp. 69–478. (*Jub.* = Hegel, *Sämtliche Werke*, Jubiläumsausgabe, vols. 1–20, ed. by Hermann Glockner. Stuttgart: Friedrich Frommann Verlag 1928–41.)

<sup>32</sup> I.e. "Das Wesen," *Jub.* 4, pp. 479–721.

<sup>33</sup> I.e. "Die Lehre vom Begriff," *Jub.* 5.

<sup>34</sup> See Helmut Schneider, "Zur zweiten Auflage von Hegels Logik," *Hegel-Studien*, vol. 6, pp. 9–38.

<sup>35</sup> Ibid., pp. 30ff.

<sup>36</sup> *Wissenschaft der Logik*, vols. I–III, ed. by Leopold von Henning, vols. 3–5 (1834–35) in

Kierkegaard owned. Hegel's other principal statement on logic is the first volume of his *Encyclopädie der philosophischen Wissenschaften*, which was originally published in Heidelberg in 1817.<sup>37</sup> A final work worthy of mention is Hegel's *Philosophical Propaedeutic*, sometimes referred to as the *Nürnberg Propaedeutic*. This work is a series of lecture notes discovered by Karl Rosenkranz (1805–79) who edited and published them for the first time in 1840 as a part of *Hegel's Werke*.<sup>38</sup> Some of the material overlaps significantly with that of the *Wissenschaft der Logik*. This text is not of great significance in Hegel's *corpus* when compared to the *Wissenschaft der Logik* or the first volume of the *Encyclopädie*, but it is worthy of note for our purposes since Kierkegaard owned a copy of Rosenkranz's edition of it, which he alludes to in *Notebook 13*.<sup>39</sup>

Werder's *Logik: Als Commentar und Ergänzung zu Hegels Wissenschaft der Logik* was probably published shortly before Kierkegaard's attendance at the lectures that were based on it.<sup>40</sup> The first book of Hegel's *Wissenschaft der Logik*, "The Doctrine of Being," is divided into three main sections: "Quality," "Quantity," and "Measure." Werder's *Logik* covers only the first section, i.e., "Quality," and thus deals with only one third of the first book. It ends with the transition to "Quantity." That Werder originally planned on continuing the work is evident from the fact that on the title page the book is designated as "Erste Abtheilung." This first part, however, turned out also to be the last, for no continuation was ever published.

Werder's interest in and work on Hegel's logic was by no means exceptional. At the time there were a number of other German scholars who wrote extended works explicitly on or in the spirit of Hegel's logic. The most notable are Christian Hermann Weisse (1801–66),<sup>41</sup> Georg Andreas Hegel's *Werke*. ASKB 552–554. In *Jub*, vols. 4–5. A second edition of this text was published in unaltered form in 1841.

37. *Encyclopädie der philosophischen Wissenschaften im Grundrisse*, reprinted as *System der Philosophie*, vols. I–III, ed. by Leopold von Henning, Karl Ludwig Michelert and Ludwig Boumann, vols. 6 (1840), 7–1 (1842), 7–2 (1845) in *Hegel's Werke*. ASKB 561–563. In *Jub*, vols. 8–10.

38. Hegel, *Philosophische Propädeutik*, ed. by Karl Rosenkranz, vol. 18 (1840) in *Hegel's Werke*. pp. 1–205. In *Jub*, vol. 3, pp. 1–227.

39. See SKS, vol. 19, Notiz 3, p. 406.

40. The date of publication for the work is 1841, but it is not known when in 1841 it appeared. Werder's lectures began sometime after October 17 of that year.

41. Christian Hermann Weisse, *Grundzüge der Metaphysik*, Hamburg 1835.

Gabler (1786–1853),<sup>42</sup> and Erdmann.<sup>43</sup> Hegel's conception of logic as speculative was extremely controversial, especially for its criticism of the laws of Aristotelian logic. These scholars did their best to defend this new view against its critics, including Schelling,<sup>44</sup> Friedrich Adolf Trendelenburg (1802–72),<sup>45</sup> Johann Friedrich Herbart (1776–1841),<sup>46</sup> and Immanuel Hermann, "the younger" Fichte (1797–1879).<sup>47</sup>

Hegel's logic also drew considerable scholarly attention in Denmark. Johan Ludvig Heiberg's (1791–1860) *Outline of the Philosophy of Philosophy or Speculative Logic*, was, like Hegel's *Encyclopädie*, a textbook used by its author as the basis for his lectures (given originally in 1831–32).<sup>48</sup> This work, the first of its kind in the Danish language, is a more or less complete paraphrase of Hegel's *Wissenschaft der Logik*. Also worthy of note is Heiberg's shorter work, "The System of Logic," which appeared

42. See his review of Trendelenburg's *Logische Untersuchungen* in *Jahrbücher für wissenschaftliche Kritik*, 1841, nos. 65–72, pp. 513–574; 1842, nos. 81–87, pp. 641–694; nos. 114–119, pp. 905–950. as an essay in the second number of his journal *Perseus* in August of 1838.<sup>49</sup> Heiberg's great philosophical critic, Frederik Christian Sibbern (1785–1872) gave extensive critical discussions of Hegel's logic in his *Remarks and Investigations Primarily Concerning Hegel's Philosophy, with Regard to our Age*.<sup>50</sup> Also significant for the Danish reception is Adolph Peter Adler's (1812–69) highly readable work, *Popular Lectures on Hegel's Objective Logic* (1842),<sup>51</sup> which covers the material corresponding to "The Doctrine of Being" and "The Doctrine of Essence" from Hegel's *Wissenschaft der Logik*. This work was published after Adler lectured on this topic at the University of Copenhagen in the Winter Semester of 1840.<sup>52</sup> The Professor of Philosophy, Rasmus Nielsen (1809–84), published two works on speculative logic. The first was his *Speculative Logic in its Essentials*,<sup>53</sup> which appeared in four installments from 1841–44. This work was presumably the butt of Kierkegaard's ongoing ridicule of an incomplete system,<sup>54</sup> for the last installment stops in mid-sentence in the middle of "The Doctrine of Essence." But this criticism is not entirely fair given that

Nielsen's *Propaedeutic Logic*,<sup>55</sup> published in 1845, overlaps significantly with Hegel's "The Doctrine of the Concept," the same section which he failed to treat in his initial work. Nielsen's works were also used as textbooks or accompanying material to oral lectures.

Werder's *Logik* itself appeared in a Danish translation just one year after its original publication in German. This translation, under the title, *Logik: Som Kommentar og Supplement til Hegels "Wissenschaft der Logik,"* was the work of an undistinguished rural dean by the name of Vilhelm Johan Jacob Bothe (1811–78).<sup>56</sup> Bothe's translation was reviewed twice in Danish journals. The first review appeared on March 26, 1842, in the journal *Fredrelandet*<sup>57</sup> and was signed with the simple pseudonym "B." A second anonymous review appeared in the *Nye Intelligentsblade* on June 12, 1842.<sup>58</sup> In both of these reviews, the work is warmly recommended to the public and regarded as an important contribution to Danish philosophical literature.

Kierkegaard had an unmistakable interest in Hegel's speculative logic. He owned copies of all three of Hegel's main works on the subject: the *Wissenschaft der Logik*,<sup>59</sup> the *Encyclopädie*,<sup>60</sup> and the *Philosophische Propädeutik*.<sup>61</sup> In addition to Werder's book he also owned a copy of Erdmann's Hegelian logic,<sup>62</sup> as well as Heinrich Moritz Chalybäus' (1796–1862), *Historische Entwicklung der speculativen Philosophie von Kant bis Hegel*,<sup>63</sup>

Hegel's logic is treated in Lecture 13, pp. 284–307. See also *Historisk Udvikling af den speculatieve Philosophie fra Kant til Hegel*, trans. by S. Kattrup, Copenhagen 1841. ASKB 462. In this translation, which is based on the second edition of Chalybäus' work (Zweite verbesserte und vermehrte Auflage, Dresden and Leipzig 1839), Hegel's philosophy is treated in Lectures 13–17, pp. 252–376. Hegel's logic is treated in Lectures 14–16, pp. 272–339.

and Staudenmaier's *Darstellung und Kritik des Hegelschen Systems*,<sup>64</sup> both of which treat Hegel's logic extensively. It is difficult to pinpoint exactly when he acquired each of these works, and thus it is not easy to say whether his interest in Hegel's logic antedates Werder's lectures or whether it arose later, perhaps as a result of them in the mid 1840s. At any rate, these works were published and available prior to or at the time of Werder's lectures. Later he developed an interest in Trendelenburg and acquired his *Logische Untersuchungen* and *Die logische Frage in Hegels System: Zwei Streitschriften*.<sup>65</sup> He also owned the works of the Hegel critic Immanuel Hermann Fichte<sup>66</sup> and most of the Danish works on Hegel's logic mentioned above.<sup>67</sup> Thus, his interest in Werder's logic seems to be consistent with his continuing interest in the discussions surrounding Hegel's logic that were taking place in the 1830s and '40s.

### III. Werder's Lectures

The catalogue of courses at the Friedrich-Wilhelms-Universität zu Berlin for the Winter Semester 1841–42 (which began on October 17, 1841) lists two offerings by Werder.<sup>68</sup> The one Kierkegaard attended was entitled, “Logik und Metaphysik mit besonderer Rücksicht auf die bedeutendsten älteren und neuen Systeme,” the title of which recalls the courses on “Logik und Metaphysik” regularly offered by Hegel.<sup>69</sup> Werder's course was given Mondays, Tuesdays, Thursdays, and Fridays from 11:00–12:00. Marheineke's course was offered five days a week from 10:00–11:00, i.e.,

<sup>68</sup> *Verzeichniß der Vorlesungen, welche an der Friedrich-Wilhelms-Universität zu Berlin im Winterhalbjahr 1841–42 vom 17. Oktober an gehalten werden*. University Archive of the Humboldt University, Berlin. The course which Kierkegaard chose not attend had the cumbersome title, “Geschichte der neuern Philosophie von Cartesius an als Quellenstudium behandelt, mit besonders ausführlicher Darlegung des Schelling'schen Systems und einer einheitlichen Übersicht der gesammten Geschichte der Philosophie.” The course was given in the afternoon every Monday, Tuesday, Thursday and Friday from 5:00–6:00.

<sup>69</sup> See Hans-Christian Lucas, “Hegels Vorlesungen über Logik und Metaphysik,” op. cit., pp. 32–40. See also “Übersicht über Hegels Berliner Vorlesungen,” in Hegel's *Berliner Schriften*, ed. by Johannes Hoffmeister, op. cit., pp. 743–749.

an hour earlier than Werder's. This explains why the most extensive part of Kierkegaard's notes to Werder's lectures appears in the same notebook (i.e., *Notebook 9*), in which he took notes to Marheineke's lectures. Since Kierkegaard apparently went first to Marheineke's lecture and then to Werder's, it was convenient to use the same notebook to take notes for both courses. Werder's course is listed in the catalogue as “privatum” (a variant of the usual *privatissime*), meaning that it was not a large public lecture, which was in principle open to anyone who wanted to come, but rather was intended for a smaller, more select or advanced group, who presumably had to obtain Werder's consent and pay a small fee in order to attend.

Although Werder's lectures seem to be based primarily on his *Logik*, there are some significant differences.<sup>70</sup> As noted, Werder's book covers only the first third of the first book of Hegel's *Wissenschaft der Logik*. Kierkegaard's lecture notes, however, include an outline of the categories that covers all of Book One and most of Book Two.<sup>71</sup> Kierkegaard's notes contain individual reflections on some of the categories from the outline, which go beyond the material covered in Werder's book.<sup>72</sup> The final entry in Kierkegaard's notes before that with the outline of categories treats the fact in itself [*die Sache an sich*] and condition [*Bedingung*];<sup>73</sup> these categories come from the last part of the chapter on “Ground” in Book Two of the *Wissenschaft der Logik*.<sup>74</sup> Werder's lectures thus advanced much further into the Hegelian system than did his book. Kierkegaard's notes on the categories, which are introduced in the second half of Hegel's logic are at best fragmentary and suggest that Werder ended his lectures

<sup>70</sup> Taylor confuses Werder's book with the lectures, taking the two to be completely synonymous. Mark C. Taylor, *Journeys to Selfhood: Hegel and Kierkegaard*, Berkeley: University of California Press 1980, p. 163. (Reprint: New York: Fordham University Press 2000, p. 163; SKS, vol. 19, Note 9; pp. 280–282).

<sup>71</sup> SKS, vol. 19, Note 9; pp. 280–282.

<sup>72</sup> For example Kierkegaard has notes on the categories of quantum (SKS, vol. 19, Note 9; pp. 278f.), measure (SKS, vol. 19, Note 9; p. 279), identity and difference (SKS, vol. 19, Note 9; p. 279), and the fact in itself (*die Sache an sich*) and condition [*Bedingung*] (SKS, vol. 19, Note 9; p. 279), none of which are treated in Werder's book.

<sup>73</sup> SKS, vol. 19, Note 9; p. 279.

<sup>74</sup> Hegel, *SL*, pp. 469–478; *Jub.* vol. 4, pp. 585–596. (SL = Hegel's *Science of Logic*, trans. by A.V. Miller, Oxford: Clarendon Press 1977.)

in Winter Semester at that point. A continuation of the course was announced in the catalogue for the subsequent summer semester, but by then Kierkegaard had returned to Copenhagen. The scope of Werder's book and the lectures which Kierkegaard attended thus compare to Hegel's logic as a whole as follows:

Hegel's Book <i>Wissenschaft der Logik</i>	Werder's Lectures <i>Logik und Metaphysik</i> <sup>75</sup>	Werder's Book <i>Logik. Als Com- mentar und Ergänzung zu Hegels Wissenschaft der Logik</i>
Erstes Buch: Seyn Erster Abschnitt: Qualität Zweiter Abschnitt: Quantität Dritter Abschnitt: Das Maß	Erstes Buch: Seyn Erster Abschnitt: Qualität Zweiter Abschnitt: Quantität Dritter Abschnitt: Das Maß	Erstes Buch: Seyn Erster Abschnitt: Qualität
Zweites Buch: Wesen Erster Abschnitt: Das Wesen als Reflexion in ihm selbst Zweiter Abschnitt: Er schei- nung	Zweites Buch: Wesen Erster Abschnitt: Das Wesen als Reflexion in ihm selbst	Zweites Buch: Wesen Erster Abschnitt: Das Wesen als Reflexion in ihm selbst
Dritter Abschnitt: Die Wirk- lichkeit	Dritter Abschnitt: Die Wirk- lichkeit	Dritter Abschnitt: Die Wirk- lichkeit
Drittes Buch: Der Begriff Erster Abschnitt: Die Sub- jektivität Zweiter Abschnitt: Die Ob- jektivität Dritter Abschnitt: Die Idee		

Given the fact that Werder stopped at almost the exact midpoint of the material from the *Wissenschaft der Logik*, it is likely that he originally conceived these lectures as a two-semester course.

Werder apparently enjoyed some celebrity. In the Winter Semester 1845, some four years after Kierkegaard's visit, his fellow Dane Peter Michael Stilling (1812–69)<sup>76</sup> attended Werder's lectures, apparently on the same subject. In a letter dated February 14, 1845, to Sibbern, Stilling writes,

Werder's... lectures on "Metaphysics" were ultimately the only ones which were worth hearing; for another thing, his exercises in disputation were an excellent school for dialectical suppleness. Of all the logicians of the Hegelian school, Werder is actually the only one who possesses a

<sup>75</sup> Stilling, often the target of Kierkegaard's criticism, was the author of the following "Hegelian" works: Peter Michael Stilling, *Philosophiske Betragninger over den specielle Logiks Betydning for Videnskaben*, Copenhagen 1842. *Den moderne Atheisme eller den saakkaldte Neohegelianismes Conseptuer af den hegelske Philosophie*, Copenhagen 1844. ASKB 801. See also his *Om den indbundne Forsoning af Tro og Videns med sterligt Hensyn til Prof. Martensens Dogmatik*, Copenhagen 1850. ASKB 802.

little freedom and mobility of spirit. Leopold v. Henning – and especially Gabler – have made an impression on me more or less like an old horse, who with old age is now just trotting along; he is indescribably dry and boring, a man of reason, wholly lacking imagination. He can ... as Werder fittingly said of him "certainly say a, b, c, but not ABC." He can admittedly distinguish the moments in the movement of thought, but he has no eye for the concrete, speculative whole, nor does he have the ability to speak about it, for he lacks imagination.<sup>76</sup>

It is natural for Stilling to compare Werder to von Henning and Gabler since they were also Hegelian logicians.

Another contemporary report comes from the philologist and linguist Caspar Wilhelm Smith (1811–81),<sup>77</sup> who was in Berlin at the same time as Kierkegaard in fall 1841 and even mentions him in his letters.<sup>78</sup> In a letter dated July 13, 1841, to his half-brother Johannes Fibiger (1821–97), Smith writes the following of Werder's lectures: "In philosophy I have begun to read Hegel's *Encyclopédie*, but I cannot say that I have advanced very far. I am attending a lecture on the history of philosophy by Werder, an instructor who attracts all the students, for which reason the philistine world is trying, to the best of its abilities, to throw mud on him ..."<sup>79</sup> Regarding Werder's lectures, Smith continues, "With what concerns Werder, he brings together a lively lecture and an extraordinary thoroughness, in which he surpasses our [sc. Danish] instructors, at least in my opinion. His lectures and those of Schott are the only ones which I attend with regularity and interest."<sup>80</sup>

Further useful information and interesting impressions come from Hans Bröchner (1820–75), who attended Werder's lectures on logic in 1846. On May 1, 1846, in his first letter after his arrival in Berlin, he writes the following to the historian Christian Molbech (1783–1857):

<sup>76</sup> Jens Holger Schjørring, "P.M. Stilling," in his *Teologi og filosofi. Nogle analyser og dokumenter vedrørende Hegelianismen i dansk teologi*, Copenhagen: G. E. C. Gads Forlag 1974, pp. 54f.

<sup>77</sup> H.-D. Schepelern (ed.), "Fillologen Caspar Wilhelm Smiths Rejs breve 1841–1845," in *Dansk Magazin indholdende Bidrag til den danske histories oplysning*, 7th series, vol. 5, Copenhagen 1949–53, pp. 81–172, see pp. 96f.

<sup>78</sup> Ibid., pp. 11, 12.

<sup>79</sup> Ibid., pp. 96f.

<sup>80</sup> Ibid., p. 97.

Among the professors, I have until now only visited Werder, whose lectures on logic I am attending. He is a very interesting man and, as far as I know, one of the only ones here who gives a truly free lecture. The instructors here usually make no distinction between an oral lecture and a written treatise; they do not give helpful overviews but the entire mass of information signed and sealed; in fact, they give scholarly monologues and they do not even think of the listeners sitting opposite them, who are supposed to appropriate the lecture. Many of them read directly from their notes. Werder, by contrast, has the skill of being able to present the material in a fresh manner without repeating himself, and thus he is able to create a rapport with his auditors. They must always follow along, and the irony which he inserts here and there forces them to stay awake. He has a remarkable interest in his field; he told me that he was now lecturing on logic for the 21st time in 21 semesters, and he still lectures on this subject with life and energy as if it had the charm of something completely new for him. With great willingness he made me the offer that I should come to him as soon as there were points either in what he was teaching or in his field in general, about which I might wish elucidation, and he encouraged me to remain here at least for the winter since the lectures in general are more refined and the stay more pleasant.<sup>81</sup>

Like the other reports Brøchner unambiguously attests to Werder's skills as a lecturer, especially when compared to the other instructors at the university. Also of interest is the fact that Werder had lectured on Hegel's logic for 21 semesters running. This makes one wonder why the further installments of his book never appeared, given the fact that he had ample opportunity to continue his work on the subject. In another letter from July of the same year, Brøchner names Werder's lectures explicitly among the benefits of his stay in Berlin. Consistent with his assessment in the previous letter, he refers to this course as "perhaps the only real lecture which is given here."<sup>82</sup>

81. Harald Höffding (ed.), *Hans Brochner og Christian K.F. Molbech: En Brevværling (1845-1875)*. Copenhagen: Gyldendalske Boghandels Forlag 1902, p. 15.

82. Ibid., p. 19. That Werder was an excellent lecturer is confirmed by another biographical account (albeit presumably from a somewhat later period): "Denn W.[erder] war ein Meister des Vortrags. Wer in seine Vorlesungen ging, that es hauptsächlich um des Redners willen. Das wußte W[erder], und es schmeichelte ihm. Bei seinem berühmten Abendcolleg war der größte Hörsaal der Universität dicht gefüllt; neben den Studenten saßen würdige Grauköpfe, Officiere,

#### IV. Kierkegaard's Statements about Werder

Kierkegaard's explicit statements about Werder all come from the *Nachlass* and can be divided into four groups: (A) letters, (B) reflections on Werder's lectures in *Notebook 8*, (C) actual notes to Werder's lectures in *Notebook 9*, and (D) two further brief comments, one in *Notebook 13* and one on a loose paper.

##### A. Letters

In Berlin far from friends and family, Kierkegaard wrote a number of letters which describe, often in some detail, his experiences at the University. These include three which discuss Werder. The first is dated November 18, 1841, i.e., some three weeks after his arrival in Berlin and addressed to Peter Johannes Spang (1796–1846),<sup>83</sup> priest at the Church of the Holy Ghost. Kierkegaard describes the atmosphere of Schelling's crowded first lecture and notes, "I happened to sit between notable people... Prof. Werder and Dr. Gruppe."<sup>84</sup> It is understandable that Werder and other faculty members would have attended these lectures since Schelling's course was a major event.<sup>85</sup> Schelling had not published anything for years, and the academic world was bristling with excitement to learn what philosophical standpoint he had arrived at. Schelling's inaugural lecture course, *Philosophie der Offenbarung*, which Kierkegaard attended, was much await-

und auch Damen ... Schon die Zurüstung war mit einer gewissen Feierlichkeit verbunden und erregte die Erwartung; der Stuhl auf dem Katheder mußte immer in der gleichen schiefen Richtung stehen. Dann kam der kleine Herr eiligen Schrittes herein, warf den Pelzmantel malerisch über den Sitz, legte die goldne Uhr neben sich und begann. Er setzte leise beim Sprechen ein, bedeutungsvolle Pausen, vorbereitende Gesten unterbrachen den Vortrag; allmählich aber schwoll die Stimme zu vollem Klang an. In alledem steckte viel schauspielerische Berechnung; aber ihm stand sie an. Er wußte, wie man durch das Zusammenspiel von Klang der Stimme, Gestus, Blick des Auges, Beugung des Körpers Stimmung erzeugen kann; und er brauchte Stimmung für seine Zwecke und weckte sie ja auch tatsächlich." Quoted from Albert Käster, "Karl Friedrich Werder," in *Allgemeine Deutsche Biographie*, op. cit., vol. 44, p. 485.

83. See *Encounters with Kierkegaard: A Life as Seen By His Contemporaries*, trans. and ed. by Bruce H. Kimmse. Princeton: Princeton University Press 1996, pp. 11f., p. 242.

84. LD, 51; B&A, p. 77.

85. The other person mentioned by Kierkegaard is Otto Friedrich Gruppe (1804–76), from 1844 Professor of Philosophy in Berlin and from 1863 the Secretary of the Academy of Arts. Why he is considered one of the "notable people" here in 1841 is unclear. See Max Lenz, *Geschichte der Königlichen Friedrich-Wilhelms-Universität zu Berlin*, op. cit., vol. 2, 2, pp. 138f.

ted and extremely popular. Moreover, during that same semester Werder himself was teaching a course “*mit besonders ausführlicher Darlegung des Schellingischen Systems*.<sup>86</sup> Werder's course was by necessity confined to treating Schelling's early work, but he would presumably also have been interested in Schelling's more recent philosophical views.

The second letter is dated about a month later on December 15, 1841. Kierkegaard writes to Sibbern, his old dissertation advisor, of his enthusiasm for Werder's lectures:

So here I am in Berlin going to lectures. I am attending lectures by Marheineke, Werder and Schelling . . . Werder is a virtuoso; that is all one can say about him. I suspect that he must be a Jew, for baptized Jews always distinguish themselves by their virtuosity and of course do participate in all fields nowadays. Like a juggler, he can play and frolic with the most abstract categories and with never so much as a slip of the tongue even though he talks as fast as a horse can run. He is a scholastic in the old sense; he has found in Hegel what they found in Thomas Aquinas, not just the *summa* and the *summa summariae* but the *summa summarum*. In this respect he is almost a psychological phenomenon for me. His life, his thought, the richness of the outside world almost seem meaningful to him only when they have reference to Hegel's *Logik*. It is, however, very advantageous for the young people studying at the University to have such a man.<sup>87</sup>

Here Werder seems to be praised primarily for his rhetorical abilities, i.e., for his mastery of the technical jargon of Hegel's philosophy and for his ability to employ it without hesitation or flaw in his analysis of the categories. The observation that Werder “talks as fast as a horse can run” may explain why Kierkegaard's notes to his lectures are not particularly detailed. It would have been difficult for him to note much more than fleeting observations and general headings, given that, in addition to the intrinsic difficulty of the subject matter itself, Werder was speaking so quickly in a language that was not Kierkegaard's own. This letter also evidences a

86. *Vorlesungen, welche an der Friedrich-Wilhelms-Universität zu Berlin im Wintersemester 1841–42 vom 17. Oktober an gehalten werden*, op. cit., “Geschichte der neuen Philosophie von Cartesius an als Quellenstudium behandelt, mit besonders ausführlicher Darlegung des Schelling'schen Systems und einer einheitlichen Übersicht der gesammten Geschichte der Philosophie.”

87. LD, 55; B&A, p. 84. Translation slightly modified.

slight ambivalence towards Werder. Although Werder seems to be “almost a psychological phenomenon” due to his obsession with Hegel's logic and his tendency to interpret everything through its prism, his teaching is nonetheless lauded as “very advantageous for the young people studying at the University.” Thus, Werder is by no means made the object of Kierkegaard's scorn as a blind Hegelian parrot as, for example, Heiberg and Martensen are later.

The third and final letter is again addressed to P.J. Spang and dated January 8, 1842. There Kierkegaard writes at the end of the letter,

Werder juggles with the categories as the strong man in Dyrehavn juggles with balls weighing twenty, thirty, forty pounds. It is terrifying to watch, and as in Dyrehavn one is sometimes tempted to believe that they are paper balls. He is not only a philosopher but a poet as well. He has written a monstrously long play called *Christopher Columbus*, which lasts from 5:30 to 10 p.m. despite the censor's having deleted some 600 lines. Yet, in another sense it lasts even longer, for it spans fourteen years, and that being so, one should praise his brevity. It was performed for the first time last night, but it was impossible to get a ticket. My time is up, and I have Werder's example warning me to strive for brevity.<sup>88</sup>

In the first part of this passage Kierkegaard repeats more or less what he said to Sibbern a month earlier, comparing Werder with a juggler. What is new is the second half. Here Kierkegaard alludes to an entirely different aspect of Werder's activity, namely his drama *Christopher Columbus*.<sup>89</sup> Here there is a tone of satire regarding the length of the piece, but Kierkegaard seems rather restrained in his critique. Moreover, this satire has nothing to do with Hegel's logic.

88. LD, 61; B&A, p. 93. Translation slightly modified.

89. This was the work with which Werder hoped to establish himself as a major dramatist in the German language. It was performed for the first time here in 1842, with subsequent performances in 1847 at the Charlottenburg Schloßtheater, in 1882 in Mannheim, and finally again in Berlin in 1892. Unfortunately, this work never attained the critical acclaim that Werder had hoped for. See Albert Käster, “Karl Friedrich Werder,” in *Allgemeine Deutsche Biographie*, op. cit., vol. 44, pp. 482–483.

### B. Notebook 8

Werder is mentioned twice in *Notebook 8* in a section with the heading, “*Notanda. ad philosophiam pertinentia.*”<sup>90</sup> The sense that this is intended as an independent section is reinforced by the fact that, in addition to bearing this title, these entries are written in the notebook from the back.<sup>91</sup> The remaining entries under this heading concern Hegel's *Lectures on Aesthetics*,<sup>92</sup> which Kierkegaard was apparently reading at the same time.<sup>93</sup>

(1) The first entry that concerns Werder is dated December 1 [1841]. It can be broken down into three parts, which are separated in the text by dashes. (A) The first part begins as follows: “In what Werder has covered so far, there are two points which I believe are important for any understanding in dogmatics.”<sup>94</sup> This indicates Kierkegaard's primarily theological interest in the metaphysical categories that Werder was discussing. He seems not interested in the categories for their own sake or for that of Werder's or Hegel's speculative logic but rather for their possible application to Christian dogmatics.

The two points that he notes concern two different transitions in the categorial movements. Kierkegaard describes these in a very compact fashion as follows:

The one is the transition from *Werden* to *Daseyn*; the other is the transition from changeableness to unchangeableness, finitude to infinitude. *Entstehen* (*Nichts* in *Seyn*) and *Vergehen* (*Seyn* in *Nichts*) are in each other: this expressed as rest, as product, is consequently not *werden* but *was geworden ist*, i.e., *Daseyn*.<sup>95</sup>

The first transition mentioned, i.e., that from *Werden* to *Daseyn*, corresponds to the section “*Auflösung des Werdens*” in Werder's *Logik*.<sup>96</sup> The other: this expressed as rest, as product, is consequently not *werden* but *was geworden ist*, i.e., *Daseyn*.

<sup>96.</sup> Werder, *Logik*, pp. 108–11. This corresponds in Hegel to SL, pp. 106–108; Juh. vol. 4,

first triad of Hegel's logic consists of the categories being, nothing and becoming. The transition in question is that between this initial triad and the second one, which consists of determinate being (*Daseyn*), finitude and infinity. In this transition the category of becoming is conceived as having two aspects or “moments”: coming-to-be (*Entstehen*) and ceasing-to-be (*Vergehen*). Each of these expresses the concept of becoming in its own direction or with its own vector, so to speak. Coming-to-be is becoming directed towards being, while ceasing-to-be is becoming directed towards nothing. Their unity leads to the next category, determinate being. This is what is expressed in the passage with the otherwise cryptic statement: “*Entstehen* (*Nichts* in *Seyn*) and *Vergehen* (*Seyn* in *Nichts*) are in each other.”<sup>97</sup>

The second aspect of this transition is when these two moments of the category becoming, i.e., coming-to-be and ceasing-to-be, are considered to be at rest. This is when determinate being arises. All determinate beings are mutable, i.e., they are always in a process of change somewhere in the movement of coming-to-be and ceasing-to-be. But these movements often take place over long periods of time and are not always clearly discernable. Thus, when a thing is considered in this way, i.e., as being at rest in this process, it is determinate.<sup>98</sup> It has come into being without yet having ceased to be. Kierkegaard notes this in the passage thus: “this expressed as rest, as product, is consequently not *werden* but *was geworden ist*, i.e., *Daseyn*.” This wordplay appears at this transition in Werder's text and in Hegel's *Encyclopädie*, albeit in the student additions.<sup>99</sup>

<sup>97.</sup> Hegel, *Logik*, p. 98. “Both [sc. coming-to-be and ceasing-to-be] are the same, *becoming*, and although they differ so in direction they interpenetrate and paralyze each other. The one is *ceasing-to-be*: being passes over into nothing, but nothing is equally the opposite of itself, transition into being, coming-to-be. This coming-to-be is the other direction: nothing passes over into being, but being equally sublates itself and is rather transition into nothing, is ceasing-to-be” (SL, p. 106; Juh. vol. 4, p. 119). See also Hegel, SL, p. 106; Juh. vol. 4, p. 119: “... becoming is the vanishing of being in nothing and of nothing in being ...”

<sup>98.</sup> The intended contrast here is clearly with the previous category of being, which is unchanging and eternal. Pure being does not come-to-be or cease-to-be. It is. It exists eternally.

<sup>99.</sup> Werder, *Logik*, pp. 108f: “Verschwundenseyn seiner selbst, sein eignes; also ein Aufheben

Kierkegaard's comment on this first part of the entry is as follows:

"This sounds good enough, but it involves sheer play with the concept of time, which is not given and which I think cannot be given in logic anyway."<sup>100</sup> The reference to "sheer play" seems to be to the last part of the passage: "this expressed as rest, as product, is consequently not *werden* but was *geworden ist*, i.e., *Daseyn*." Kierkegaard seems to object to the word-play involved in the verbal forms "werden" and "geworden ist," which, as noted above, also figures prominently in Werder's book.<sup>101</sup> The claim that the concept of time cannot be captured in logic seems to anticipate what might be called the existential aspect of Kierkegaard's later thinking, i.e., his belief that the scholarly fields of "objective thinking" cannot in principle capture the existential aspects of the life of the individual.

To return to Kierkegaard's original comment about the possible significance of these categories for dogmatics, his concern appears to be with the dogma of the incarnation, which will become so important for him later in works such as *Philosophical Fragments*. This seems to be confirmed by the fact that in the other entry where Werder appears in this notebook (discussed just below), he is mentioned in connection with Marheineke's

das innerhalb des Werdens bleibt; das Werden verschwindet ... aber nur in sich. Es härt auf, es vergleicht, als Werden. Das heißt: es ist das vergangene Werden[,] es ist: Geworden. Was geworden ist, das ist da. Jedes Präteritum ist im Geiste ein Präsens. Werden als Geworden ist Daseyn." Ibid., p. 109: "Im Werden ist die unbestimmtste Rühe, das Seyn, das abstrakte Entstehen, aufgehoben; darum ist es rastlose Bewegung: Vergehen ... welches als rastlose Bewegung selbst vergeht, und als die Bewegung des sich selbst-Produzierens Entstehen und somit bestimmt in sich bewegte Ruhe: Geworden, Daseyn ist." Hegel, *EL*, § 89, Addition; *Jub.* vol. 8, p. 217: "Das Resultat aber dieses Prozesses ist nicht das leere Nichts, sondern das mit der Negation identische Seyn, welches wir Daseyn nennen, und als dessen Bedeutung sich zunächst dieß erweist, geworden zu seyn." N.B. this wordplay does not appear in the *Wissenschaft der Logik* (at least not at this transition).

100. *JP*, vol. 1, 257; SKS, vol. 19, Not8:50, p. 245.

101. Later in *The Concept of Anxiety* he objects to a similar wordplay from Hegelian logic with the words "Wesen" and "gewesen": CA, p. 12n.; SKS, vol. 4, p. 320n.: "Wesen ist was ist gewesen; ist gewesen ist ein tempus praeteritum of Seyn, ergo, Wesen ist das aufgehobene Seyn, the Seyn that has been. This is a logical movement! If anyone would take the trouble to collect and put together all the strange pixies and goblins who like busy clerks bring about movement in Hegelian logic (such as this is in itself and as it has been improved by the school), a later age would perhaps be surprised to see that what are regarded as discarded witticisms once played an important role in logic." See SKS, vol. K4, p. 363. For this wordplay in Hegel see *EL*, § 112, Addition; *Jub.*, vol. 8, p. 263: "As for the further significance and use of the category of essence, we can recall first at this point how the term 'Wesen' is employed to designate the past for the German auxiliary verb 'sein'; for we designate the being that is past as 'gewesen.' See also *PhS*, p. 63; *Jub.*, vol. 2, p. 88: "The Now, as it is pointed out to us, is Now that *has been*, and this is its truth; it has not the truth of *being*. Yet this much is true, that it has been. But what essentially *has been* [gewesen ist] is, in fact, not an essence that is [*kein*] Wesen; it is not, and it was with *being* that we were concerned."

lectures of dogmatics. There Kierkegaard names the doctrine of the incarnation explicitly.<sup>102</sup> The connection seems to be something like the following: the idea that a transcendent God can become incarnate and appear in time corresponds to the movement from the category of being to that of determinate being. The category of being is, like the divine, eternal. By becoming incarnate, God becomes temporal, just like determinate being. To put it in purely speculative terms, the incarnation would be the coming-to-be and the crucifixion the ceasing-to-be, i.e., in time. Kierkegaard has his pseudonym Johannes Climacus treat this in some detail in the *Fragments*, where he objects to claims for the purported dialectical necessity of such transitions. Thus, his claim that the concept of time cannot be captured in logic seems to anticipate, among other things, his later doctrine of the paradox.

(B) There follows a dash to indicate a break after which Werder treats two further categories: something (*Etwas*) and other (*Anderes*). Kierkegaard writes the following:

*Etwas* and *Anderes* are not merely in each other, but *Etwas* is only insofar as it is *Anderes*, and *Anderes* only insofar as it is *Etwas*; they fashion each other. The movement is a redoubling. On one side *Etwas*. As *an sich* it is *Etwas*; as being for another it is *Anderes* – *Anderes* is *an sich Anderes*; as a being for another it is *Etwas*. But thereby *Etwas* – consequently is – through *Anderes*; and consequently *Etwas* is not only *Anderes* but *nur Anderes*, and this is expressed by *Andterseyn*, but this expressed as unity is change.<sup>103</sup>

In contrast to the first part of this entry just treated, this passage after the dash has much more the look of an actual note written during the lecture itself. The passage refers to the way in which the categories of something (*Etwas*) and other (*Anderes*) are related to one another dialectically in Hegel's logic. The point is quite simply that any something implies an opposite, i.e., something else, and conversely for something else to exist implies that it is compared with a previous something which was the original point of departure. The two concepts thus mutually determine and imply each other.<sup>104</sup> The last part of this passage about change

102. *JP*, vol. 3, 3285; SKS, vol. 19, Not8:52, p. 246.

103. *JP*, vol. 1, 257; SKS, vol. 19, Not8:50, p. 245.

104. Cf. Werder, *Logik*, pp. 126–133, especially pp. 132f. "Das Etwas ist für Anderes und das

being the expression of their unity is also found in Werder's book.<sup>105</sup> (C) There is a third point at the end of this entry that Kierkegaard also notes: "Finitude is what *am Ende ist*; consequently the finite is *was gewesen ist*. But infinitude? It is finitude which is not itself (nonfinitude – both); consequently it is infinitude; *was nicht gewesen ist*."<sup>106</sup> This too has the look of an actual lecture note. What is at issue here is the dialectical relation that exists between finitude and infinity in Hegel's logic.<sup>107</sup> Hegel constantly polemizes against what he refers to as "the bad infinity" (sometimes translated as "the spurious infinity").<sup>108</sup> This understanding of the concept is the common sense conception of adding or repeating a term endlessly in the sense that we tend to think that numbers are infinite since we can always add one more. Hegel disapproves of this notion since it is not dialectical. Thus, it leads nowhere and causes the dialectical movement to come to a halt, only to be replaced with a mechanical repetition. The true conception of infinity is one whereby infinity is conceived in its determinate opposition to finitude. In other words, the finite could not exist without the infinite and vice versa. This is expressed in the passage where Kierkegaard writes, "It is finitude which is not itself (nonfinitude ... both); consequently it is infinitude."<sup>109</sup> The rest of

Andere ist für Etwas, was heißt das? Es heißt: das Etwas ist außerdem daß es Etwas und *nicht* das Etwas ist, *auch* das Andre, und das Andre ist, außerdem daß es das Andre und *nicht* das Etwas ist, auch Etwas. Noch nicht *total* ist jedes das andere, sondern wie gesagt: nur momentan, d.h. *auch*. Sie sind in Einheit mit *einander* oder sind Eines als *zwei*! This corresponds to Hegel's SL, pp. 117–122; *Jub*, vol. 4, pp. 132–139. See also EL, §§90–95; *Jub*, vol. 8, pp. 217–227.

105. Cf. Werder, *Logik*, p. 138: "Die Wahrheit des Ewigs und des *Anderen* ist die Veränderung. Als Veränderung hat der Begriff des Daseyns sich realisiert. Das Daseyn seinem Begriffe nach ist die Gegenwart des Werdens. Dieses gegenwärtige daseyende Werden, *das Geworden als Werdendes*, als Werden seiner selbst, nennen wir die *Veränderung*." See also Hegel, EL, § 92; *Jub*, vol. 8, pp. 219–221.

106. *JP*, vol. 1, 257; SKS, vol. 19, Not8:50, p. 245.

107. Cf. Werder, *Logik*, p. 152: "Das Endliche mit sich zusammengehend *vergleitet*; das wohrin es, warum es, kraft dessen es vergeht, ist also es *selbst* als *nicht es selber*. Das aber sagt das Unendliche aus und sonst nichts ... In dem Worte: *Un - endlich* liegt offenbar der Gedanke des Unendlichen ... der Gedanke, daß es das *Endliche* selber als *nicht es selber* ist." This corresponds to Hegel SL, pp. 129–150; *Jub*, vol. 4, pp. 147–175. See also EL, §§ 92–95; *Jub*, vol. 8, pp. 219–227.

108. See, for example, Hegel, EL, § 94; *Jub*, vol. 8, pp. 222; SL, p. 139; *Jub*, vol. 4, pp. 160–161. Kierkegaard refers to this concept frequently: *JP*, vol. 4, 385?; SKS, vol. 17, DD:77, p. 248; EPW, p. 122; SKS, vol. 17, DD:208, p. 295; *JP*, vol. 4, 385?; SKS, vol. 17, DD:77, p. 247; CI, pp. 21–22; SKS, vol. 1, p. 82; EO1, p. 292; SKS, vol. 2, p. 281; EO2, p. 226; SKS, vol. 3, p. 34; CUP1, pp. 112f.; SKS, vol. 7, pp. 109f. CUP1, p. 338; SKS, vol. 7, p. 309; *JP*, vol. 2, 157?; SKS, vol. 18, EE:35, p. 17; *JP*, vol. 2, 157?; SKS, vol. 18, EE:19, p. 45; *JP*, vol. 3, 281; SKS, vol. 20, NB:76, p. 67.

109. Compare this to the way it is phrased in Werder's *Logik*, p. 153: "So kann man sagen: Das Endliche selbst ist das Unendliche ... und man sagt so, wenn man weiß, was man sagt. Das

passage can be explained as follows. A finite series of numbers is one which is complete or at an end, or, as is written in the passage, "Finitude is what *am Ende ist*." By contrast, an infinite series of numbers is one which has not yet been completed or "*was nicht gewesen ist*".

Kierkegaard's critical comment on this is as follows: "Insofar as this is to be the expression for the significance of finitude, it manifestly has not received its due."<sup>107</sup> He seems to be dissatisfied with the conception of finitude as being merely the opposite of the infinite. His dissatisfaction perhaps stems from the fact that such an account of finitude fails to consider sin, which he clearly regards as essential in the conception of finite human beings.

(2) The other entry about Werder from this notebook refers to some of the categories mentioned in the previous one and thus serves to shed light on the previous discussion. Here Kierkegaard writes,

The doctrine of revelation as presented by Marheincke in his *Dogmatik* serves to illuminate the philosophic volatilization of Christian doctrinal concepts – the logical proposition that the finite is the infinite, together with the explanation Werder gives, that the stress is on the last word. All this must be gone through meticulously in order, if possible, to bring clarity into the confusion. The doctrine of the image of God according to Marheincke's lecture is also such a volatilization.<sup>111</sup>

Here he refers to the final part of the previous entry concerning the dialectical relation of infinity and finitude. Kierkegaard's objection to both Werder and Marheincke is to their dialectical conception of infinity, which makes it in a sense dependent upon finitude. This undermines it as an absolute other since it always stands in relation to the finite, as its

Endliche 'selbst' bedeutet: Das Endliche *nicht ...* sondern das Vollendete. Denn das Endliche ist nicht *selbst*, da es als Endliches nicht ist, da sein Seyn das Nichtseyn ist, und es von Ewigkeit, noch bevor es anzufangen vermag als nur Endliches, schon vergangen als solches. Das heißt: es ist nur im Unvergänglichen. Das *Selbst* des Endlichen ist das Unendliche. Daß das Nichtseyende sich manifestiert als *Nichtgewesenes*, das ist die Manifestation des Seyns selber als *des seyenden*. Und grade als diese Manifestation ist das ewige Seyn das Werden seiner selbst. Dem so ist es sein eigener Reflex und schaut sich an, *sein* Anderes seyend in sich. Was heißt denn: *Nichtgewesenseyn*? Seyn heißt es, *ewiges absolutes Seyn*; der andre Ausdruck dafür ist es, *sein* ander Ausdruck, sein eigener, sein Reflex, sein Wort, darin es sich schaut und vermittelt von Ewigkeit, es selber. Das heißt: das Endliche *selbst* ist das Unendliche."

110. *JP*, vol. 1, 257; SKS, vol. 19, Not8:50, p. 245.  
111. *JP*, vol. 3, 328?; SKS, vol. 19, Not8:52, p. 246.

opposite. Thus, it is easy to understand Kierkegaard's objection to the paradoxical formulation that "the finite is the infinite." In Werder (and Hegel) this formulation is simply meant to capture the dialectical interrelatedness of the two categories. But to formulate it in this way is, for Kierkegaard, to risk the danger of understanding it literally, which would mean that there is no difference between the two. This would of course have catastrophic consequences for dogmatics, which, for Kierkegaard, requires an "absolute difference"<sup>112</sup> between God (infinity) and human beings (finitude) or God and the created world.

The two entries in this notebook manifest clearly Kierkegaard's agenda. Although they appear in a section entitled, "*Notanda ad philosophiam pertinentia*," these notes on Werder's analyses of the logical categories are to be understood primarily in terms of their relevance for theology. This could also explain why Kierkegaard's notes are not more extensive than they are. He only bothered to take notes for the categories which seemed to have some relevance for dogmatics. The other ones were simply not relevant or interesting for him.

### C. Notebook 9

The actual notes that Kierkegaard took at Werder's lectures appear in *Notebook 9*, which, as stated, also includes his notes to Marheineke's lectures<sup>113</sup> (which are continued in *Notebook 10*).<sup>114</sup> Like the entries on Werder in *Notebook 8*, these seem to be regarded as an independent section, although there is no distinct title or heading to introduce them. This is reinforced by the fact that the notes to Marheineke's lectures were written from the front of the notebook, while those to Werder's lectures were written from the back.<sup>115</sup> There are in all only eight entries from Werder's

lectures.<sup>116</sup> The last of these is a fragmentary overview of the categories.<sup>117</sup> Kierkegaard seems not to have made any attempt to take systematic notes to Werder's lectures in the way he did for those of Marheineke and Schelling. Kierkegaard's notes follow the same general sequence as both Werder's book and Hegel's *Wissenschaft der Logik*, but there are a number of intermediary categories missing for which he took no notes.

These notes are too extensive to be treated exhaustively here, and so I will confine myself to examining just two of them of particular importance. The one entry is rather cryptic and runs as follows: "Identity ist *der mit sich identische Unterschied – Unterschied ist der von sich unterschied[en]e Identity*".<sup>118</sup> Here one can see Kierkegaard's fondness for paradoxical formulations. What is at issue here is Hegel's critique of the law of identity as nonsensical.<sup>119</sup> Statements such as, "The plant is the plant," ultimately say nothing. The first part of the statement, "The plant is..." seems to promise a meaningful predicate which will provide new information, but the completion of the proposition disappoints this expectation. Hegel thus claims a new conception of identity is needed. He argues that the concept of identity is inherent in the propositional form itself, for example, "The plant is green." Here, he claims, an assertion of identity is made by simply attributing the predicate to the subject. Thus, "The plant is green," is a statement of identity, but one which contains a difference within itself since the plant also has other properties and is not, as such, identical with the color green. This is the meaning of the first half of the statement: "Identity ist *der mit sich identische Unterschied*." The speculative concept of identity contains the concept of difference.

The second half of the statement concerns the category of difference, which is central for Hegel's famous criticism of the law of contradiction.<sup>120</sup> Parallel to his discussion of identity, Hegel argues that the concept of difference contained in the classical notion of contradiction is ultimately empty. When one says, "The rose is not red," one has not said anything

<sup>112</sup>. See CUP1, p. 412; SKS, vol. 7, pp. 374f.: "But between God and a human being (let speculate) thought just keep humankind to perform tricks with) there is an absolute difference; therefore a person's absolute relationship with God must specifically express the absolute difference, and the direct likeness becomes impudence, conceited pretense, presumption, and the like." See also PF, pp. 44–45; SKS, vol. 4, p. 249.

<sup>113</sup>. SKS, vol. 19, Not19:1, pp. 249–277.

<sup>114</sup>. SKS, vol. 19, Notto18–9, pp. 288–301.

<sup>115</sup>. See Kim Ravn and Steen Tullberg, "Tekstredigørelse" to *Notesbog 9–10* in SKS, vol. K19, p. 339.

<sup>116</sup>. SKS, vol. 19, Not19:2–9, pp. 278–282. In the *Papirer* edition these were presented as a single entry (*Pap. II C 29*, in *Pap. XIII*, pp. 330–333). These notes have never been translated into English.

<sup>117</sup>. SKS, vol. 19, Not19:9, pp. 280–282.

<sup>118</sup>. SKS, vol. 19, Not19:7, p. 279.

<sup>119</sup>. See Hegel, SL, pp. 413–416; *Jub.*, vol. 4, pp. 510–515; EL, § 115; *Jub.*, vol. 8, pp. 268–269.

<sup>120</sup>. See Hegel, SL, pp. 439–443; *Jub.*, vol. 4, pp. 545–551. EL, §§ 116–120; *Jub.*, vol. 8, pp. 270–281.

determinate since the rose could be any number of other colors.<sup>121</sup> The correct speculative understanding of difference is that of opposites or contraries (*Gegensätze*), whereby a given thing is not its opposite, i.e., north is not south, and being is not nothing. But in these complementary pairs, one can easily see a higher dialectical unity; the one is the mirror image of the other, and the one necessarily determines the other. This provides an aspect of identity to the concept of difference, i.e., north is not south, but it is identical with south when considered as longitudinal direction. This is what is meant with the second half of Kierkegaard's note, “*Unterschied ist der von sich unterschied[en]e Identität*.” The speculative concept of difference is thus one that contains the concept of identity.

The final entry is an elaborate table of categories.<sup>122</sup> I have attempted to reconstruct this table with some slight modifications in order to make clear the relation between this table and Werder's *Logik* and Hegel's *Wissenschaft der Logik*. The words that appear in bold are the ones that appear in Kierkegaard's entry. For the sake of simplicity I have changed Kierkegaard's Danish spellings of the German words to the standard German orthography of the day. Moreover, for the few times where Kierkegaard has written the categories in Danish, I have taken the liberty of changing them to the German as they appear in Werder and Hegel. I have added in square brackets the missing chapter headings or categories, following Werder's *Logik* (until the point where it ends) and then Hegel's *Wissenschaft der Logik*. These appear in normal script. This arrangement makes it easy to see what Kierkegaard left out from his notes. On the right I have referenced the corresponding sections in Werder's *Logik* (until it ends) and then Hegel's *Wissenschaft der Logik*.<sup>123</sup>

[3. Kapitel: Das absolute Verhältnis]	[696–721]

This chart covers two-thirds of Hegel's *Wissenschaft der Logik*. Only the final third, “The Doctrine of the Concept,” is missing. Note that Kierkegaard's notes are very fragmentary towards the end. Only a few of the main headings are mentioned from the final section of “The Doctrine of Essence.” It is useful to compare this overview with the entries on the individual categories. First, such a comparison makes it evident that Kierkegaard's individual entries do in fact follow the sequence of categories set forth here (albeit with some gaps). The place where Kierkegaard's notes stop, i.e., in the chapter on “Grund,” corresponds to almost the exact midpoint of the work as a whole. This suggests that the material was divided into two equal halves which Werder treated over two semesters.

#### D. Further Allusions to Werder

The *Nachlass* contains only two further references to Werder. The first appears in *Notebook 13*, which Kierkegaard names “Philosophica.”<sup>124</sup> As the title indicates, this is where he collected his reflections on philosophy along with the notes that he took while reading philosophical texts. The complete entry is as follows:

In the doctrine of being everything *is* which does not change. (This is something which even Werder admitted. See the small books.)  
 In the doctrine of essence there is *Beziehung*. – The irregularities in Hegel's logic.  
 Essentially this segment is only dichotomies – cause-effect – ground-consequent –  
 Reciprocal effect is a problem, perhaps belongs somewhere else.  
 The concept is a trichotomy.  
 Being does not belong to logic at all.  
 It ought to begin with dichotomy.<sup>125</sup>

By “the small books” Kierkegaard is presumably referring to *Notebook 8* and 9. The claim attributed to Werder seems to be limited to the first sentence and presumably does not include the rest of the entry. This original claim that “In the doctrine of being everything *is* which does not change,” refers to Hegel's contrast between the categories in “The Doctrine of Being” and those of “The Doctrine of Essence.”<sup>126</sup> The former are considered alone in their immediacy; they simply exist. By contrast, the so-called categories of reflection are characterized not by the verb “to be” but rather “to have” since they have reciprocal parts. For example, an effect *has* a cause; a thing *has* properties. It is odd that Kierkegaard says that this is something that Werder “admitted” given the fact that Hegel states it himself more or less explicitly. Perhaps the meaning of this is to be found in Kierkegaard's critical remarks in this entry. He makes a couple of cri-

<sup>124.</sup> SKS, vol. 19, Notiz 31, p. 383.

<sup>125.</sup> IP, vol. 2, 1602; SKS, vol. 19, Notiz 350, p. 415. Translation slightly modified.

<sup>126.</sup> See Hegel, SL, pp. 409–411; Iub, vol. 4 pp. 504–508; EL, § 125; *Iub*, vol. 8, p. 292. Heiberg labors this point in his main work on logic, the aforementioned *Grundtrek til Philosophiens Philosophie eller den speculative Logik: Som Lædraad ved Forelesninger paa den kongelige militaire Højskole*, op. cit., § 79, § 87.

tical comments about this organization of the categories, for example, that reciprocal effect [Væselvirkning] does not belong to “The Doctrine of Essence,” that “Being does not belong to logic at all,” and that logic “ought to begin with dichotomy.” Thus, to say that Werder “admitted” the point about the categories in “The Doctrine of Being” is a way of saying that Werder is in agreement with this general way of organizing and understanding the categories and thus that he too is open to these criticisms.

The second direct allusion to Werder, which is no less cryptic than the first, appears on an undated loose paper. There, based on a point in Hegel’s logic, Kierkegaard compares the works on logic of Adler, Werder and Heilberg. He writes:

Hegel in the logic at the transition from the doctrine of measure.  
Adler says: when the quantitative determination is indifferent, then a new quality appears – when?  
Werder is more correct.

Heilberg’s *Perseus* cf. a pencil mark in the margin to the first §§ of the logic.<sup>127</sup>

This entry, though undated, must have been written during or after 1842 since Adler’s *Popular Lectures on Hegel’s Objective Logic* did not appear until that year.<sup>128</sup> Moreover, the entry’s context suggests it was written in connection with the discussion of the leap that appears in *The Concept of Anxiety*, which of course appeared in 1844.<sup>129</sup>

The first sentence fragment refers to Hegel’s discussion of the doctrine of measure, which constitutes the transition from quantity to quality. This transition was important for Kierkegaard as a source for his celebrated doctrine of the leap. For Hegel, measure involves the quantitative increase or decrease in certain properties or aspects of a thing. These quantitative changes have, however, a natural limit. There can only be quantitative changes up to a certain point after which there is a radical

qualitative shift. In the *Encyclopädie* Hegel uses as an example the increase or decrease in the temperature of water:

the temperature of water is, up to a point, indifferent in relation to its liquid state; but there comes a point in the increasing or decreasing of the temperature of liquid water where this state of cohesion changes qualitatively, and the water is transformed into steam, on the one hand, and ice, on the other.<sup>130</sup>

Hegel then designates the radical shift from one quality to another in terms of a leap. In the *Wissenschaft der Logik*, he writes: “On the qualitative side, therefore, the gradual, merely quantitative progress which is not in itself a limit, is absolutely interrupted; the new quality in its merely quantitative relationship is, relatively to the vanishing quality, an indifferent, indeterminate other, and the transition is therefore a *leap*.<sup>131</sup> A journal entry shows Kierkegaard was familiar with this example from Hegel.<sup>132</sup> When one sees how this issue is related to the idea of a leap, then it immediately becomes clear why Kierkegaard is so interested in this logical transition.

The meaning of the reference to Werder in this context is unclear. Kierkegaard’s comments on Werder’s view of quantity and quality are limited to an entry from *Notebook 9* which makes no reference to the leap.<sup>133</sup> The category of measure is not treated in Werder’s book, and Kierkegaard offers no further information. What he thought Werder was right about and his reasons for his belief thus remain a mystery.

Given the analyses of the individual lecture notes and references to Werder, we can now return to the original question of Kierkegaard’s

<sup>127</sup> Hegel, *EL*, § 108, Addition; *Jub*, vol. 8, p. 255. Here Hegel defines the “leap” as follows: “Leap here means qualitative distinction and qualitative alteration, which appear to take place without mediation, whilst, on the contrary, what is (quantitatively) gradual presents itself as something mediated.” Hegel, *EL*, § 35, Addition; *Jub*, vol. 8, p. 110.

<sup>128</sup> Hegel, *SL*, p. 368; *Jub*, vol. 4, p. 458. See also *SL*, p. 370; *Jub*, vol. 4, p. 460. *PhS*, p. 6; *Jub*, vol. 2, p. 18. Hegel, *EL*, § 37, Addition; *Jub*, vol. 8, p. 117.

<sup>129</sup> “Leap here means qualitative distinction and qualitative alteration, which appear to take place entirely homogeneous. The leap by which water turns to ice, the leap by which I understand an author, and the leap which is the transition from good to evil. More sudden, Lessing’s Faust, the evil spirit, who is as hasty as the transition from good to evil.” Translation slightly modified.

<sup>130</sup> SKS, vol. 19, Nov 1916, p. 279: “Measure is quantitatively determined qualitative, and a qualitatively determined quantitative, it is to this extent qualitative as it is quantitative and vice versa. Here is determinacy.”

<sup>131</sup> Pap. V C 4. See Koch’s discussion of this passage. Carl Henrik Koch, *En Flue på Hegels udadelige nese*, op. cit., pp. 190ff.

<sup>132</sup> Adolph Peter Adler, *Populaire Fordrag over Hegels objektive Logik*, Copenhagen 1842. ASKB 383.

<sup>133</sup> SKS, vol. 19, Nov 1916, p. 279: “Measure is quantitatively determined qualitative, and a qualitatively determined quantitative, it is to this extent qualitative as it is quantitative and vice versa. Here is determinacy.”

general assessment of Werder. As noted in the introduction, Thulstrup and others have regarded Kierkegaard as being highly critical of Werder, qua Hegelian logician. But this assessment does not square with the passages discussed here. The times when Werder is mentioned in his letters, Kierkegaard is generally quite positive. There is a slightly ironical tone regarding Werder, but despite this he is still lauded with no trace of irony. In the actual lecture notes themselves in *Notebook 9*, there is no criticism whatsoever, either positive or negative. Further, regarding the two allusions to Werder in the passages just examined, the first is too cryptic for one to say with certainty whether it contains a criticism. In the second Werder's account of the transition of quantity to quality is praised in comparison to that of Hegel and Adler.<sup>134</sup> Although the reference is too cryptic to allow an interpretation of why Kierkegaard thinks that his account "is more correct," nonetheless there can be no doubt that this is a positive criticism. Given this, it seems that only in the two comments on Werder's lectures in *Notebook 8* do there appear critical remarks. In any case, it seems that Thulstrup's claim is highly oversimplified. While Kierkegaard is critical of some individual aspects of Werder's logic, he is by no means overtly critical or dismissive. On the contrary, there is considerable evidence of his appreciation of Werder's work and abilities.

## V. The Possible Influence of Werder's Logik on Kierkegaard's Later Works

Kierkegaard's published authorship contains no direct references to Werder or his *Logik*. Thus, in contrast to the documentation just explored about Werder's lectures, any discussion of the importance of Werder's book for Kierkegaard must remain in large part guesswork. However, given that Werder may be presumed to have used the book in his lectures and that Kierkegaard is known to have owned it, it is reasonable to assume that Kierkegaard was familiar with the book as well as the lectures. This assumption is supported by various points of contact between Werder's *Logik* and Kierkegaard's works which seem to suggest a significant influence.

<sup>134.</sup> Pap. V C 4. See Koch's discussion of this passage. Carl Henrik Koch, *En Flue på Hegels udødelige næse*, Copenhagen: C. A. Reitzels Forlag A/S 1990, pp. 190ff.

### A. The Either/Or

It was during his stay in Berlin that Kierkegaard began work on *Either/Or*, which he ultimately completed upon his return to Copenhagen.<sup>135</sup> The title of this famous work was inspired by the on-going debates about Hegel's logic and specifically by Hegel's criticism of the Aristotelian law of excluded middle.<sup>136</sup> However, Werder's use of this formulation seems also to be in the background for Kierkegaard.

In a letter from Berlin dated February 6, 1842, when he was presumably still attending Werder's lectures, Kierkegaard wrote to his friend Emil Boesen (1812–79) about the title of the book that he was currently working on: "“Either/Or” is indeed an excellent title. It is piquant and at the same time also has a speculative meaning."<sup>137</sup> By this Kierkegaard seems to refer to the implicit criticism of speculative mediation contained in this expression. The work presents two opposed positions, that of the aesthete and that of Judge Wilhelm. These positions are presented as being in fundamental opposition to one another such that no mediation or compromise between them is possible. The reader must presumably opt for either the aesthete or Judge Wilhelm. The pseudonymous editor of the work, Victor Eremita writes the following in his preface:

A's papers contain a multiplicity of approaches to an aesthetic view of life.

...B's papers contain an ethical view of life. As I allowed my soul to be influenced by this thought, it became clear to me that I could let it guide me in determining the title. The title I have chosen expresses precisely this.<sup>138</sup>

The contrasting views cannot be reconciled or sublated into a single higher position by means of Hegelian mediation. The work ends in a kind of *aporia*, and no resolution ever comes about.<sup>139</sup> The organization of

<sup>136.</sup> For a more detailed examination of this see Jon Stewart, *Kierkegaard's Relations to Hegel Reconsidered*, New York: Cambridge University Press 2003, pp. 184–195.

<sup>137.</sup> JP, vol. 5, 555; LD, 68; B&A I, p. 107. Cf. also CUP, p. 252; SVI, vol. 7, pp. 212–213; "Either/Or, the title of which is in itself indicative, has the existence-relation between the aesthetic and the ethical materialize into existence in the existing individuality. This to me is the book's indirect polemic against speculative thought which is indifferent to existence."

<sup>138.</sup> EO, p. 13; SKS, vol. 2, p. 21.

<sup>139.</sup> EO, p. 14; SKS, vol. 2, p. 21: "these papers come to no conclusion." See EO, p. 14; SKS,

*Either/Or*, captured so succinctly with the title, can be seen as a part of a polemical dialogue with Hegel's criticism of the laws of classical logic and his doctrine of speculative mediation.

The formulation “either/or” had long been used as a kind of shorthand for the law of excluded middle before Hegel.<sup>140</sup> Hegel himself often employs the term in a critical context. He argues that thinking characterized by the “either/or” is one-dimensional and fails to see that opposites are necessarily dialectically related to one another. Instead, such thinking insists on one-sided dichotomies: one is either free or determined, the world is either finite or infinite, etc. The very goal of Hegel's speculative method is to grasp the whole of the world's conceptual structure through an awareness of the necessary connections between opposing concepts of this kind. In the *Encyclopädie*, Hegel denigrates “either/or” thinking as “dogmatism,” which distorts the true meaning of concepts by isolating them. He writes,

But in the narrower sense dogmatism consists in adhering to one-sided determinations of the understanding whilst excluding their opposites. This is just the strict “either-or,” according to which (for instance) the world is *either finite or infinite, but not both*. On the contrary, what is genuine and speculative is precisely what does not have any such one-sided determination in it and is therefore not exhausted by it; on the contrary, being a totality, it contains the determinations that dogmatism holds to be fixed and true in a state of separation from one another united within itself.<sup>141</sup>

vol. 2, p. 21: “When the book is read, A and B are forgotten; only the points of view confront each other and expect no final decision in the particular personalities.” See CUP, p. 252; SV, vol. 7, p. 23: “That there is no conclusion and no final decision is an indirect expression for truth as inwardness and in this way perhaps a polemic against truth as knowledge.”

<sup>140</sup> See for example, Kant: “In logic the ‘either-or’ always denotes a disjunctive judgment; for if one member is true, the other must be false. For instance, a body is either moved or not moved, i.e., at rest; for one speaks there simply of the relation of the cognition to the object.” Kant, *Metaphysical Foundations of Natural Science*, trans. by James W. Ellington, in *Philosophy of Material Nature*, Indianapolis: Hackett 1985, pp. 126ff.

<sup>141</sup> Hegel, EL, § 35, Addition; Juh., vol. 8, p. 106. See also EL, p. 8n; Juh., vol. 8, p. 13n: “One would always do better not to talk about philosophy at all as long as, in spite of one's depth of feeling, one is still so deeply entangled in the one-sidedness of the understanding that one knows nothing better than the ‘either-or.’” EL, § 80, Addition; Juh., vol. 8, p. 189: “But again it is usually said also that the understanding must not go too far. This contains the valid point that the understanding cannot have the last word. On the contrary it is finite, and, more precisely, it is such that when it is pushed to an extreme it overturns into its opposite. It is the way of youth to

According to Hegel, dogmatism fastens on to the one or the other side of such opposite determinations and declares it to be the final truth. By contrast, speculative philosophy grasps the higher truth of such opposites by realizing their conceptual relation. It thus returns these concepts to their original dialectical context and restores them to their proper relation.

Prior to Werder's lectures, the formulation “either/or” was known to Kierkegaard if not from Hegel's primary texts, then certainly from the Danish debate about mediation that took place primarily in 1838,<sup>142</sup> in which participants on both sides of the issue employed the expression. The Hegel critics, Frederik Christian Sibbern<sup>143</sup> and Jakob Peter Mynster (1775–1854),<sup>144</sup> used the Latin version of the expression *aut/aut*, while

toss about in abstractions, whereas the man of experience does not get caught up in the abstract *either-or*, but holds onto the concrete.” EL, § 65; Juh., vol. 8, p. 17: “This standpoint is not content when it has shown that *mediate knowing*, taken *in isolation*, is inadequate for the [cognition of] truth; its particularity is that *immediate knowing* can only have the truth as its content when it is taken *in isolation*, to the exclusion of mediation. — Exclusions of this kind betray that this standpoint is a relapse into the metaphysical understanding, with its *either-or*.” EL, § 119, Addition 2; Juh., vol. 8, p. 280: “Instead of speaking in accordance with the law of excluded middle (which is a law of the abstract understanding), it would be better to say, ‘Everything that stands in opposition, there is in fact nothing, either in heaven or on earth, either in the spiritual or the natural world, that exhibits the abstract ‘either-or’ as it is maintained by the understanding. Everything that exists at all is concrete and hence is inwardly distinguished and self-opposed.’” Translation slightly modified. (My italics.) See also Juh., vol. 1, p. 410.

See also Sibbern's “Hegel i Forhold til vor Tid,” *Maanedsskrift for Litteratur*, no. 19, 1838, Article I, p. 313; Sibbern *Bemærkninger og Undersøgelser*, op. cit., p. 31.

<sup>144</sup> 144. Jakob Peter Mynster, “Rationalisme, Supranaturalisme,” *Tidsskrift for Litteratur og Kritik*, vol. 1, 1839, p. 267. (Reprinted in Mynster's *Blandede Skrifter*, vols. 1–6, Copenhagen 1852–57, vol. 2, p. 114.)

Heiberg used it in Hegel's defense.<sup>145</sup> Hegel's other champion, Hans Lassen Martensen (1808–84) used not only the Latin but also the Danish expression which became Kierkegaard's title.<sup>146</sup>

Through this debate Kierkegaard was doubtless familiar with this expression and its meaning as a slogan critical of Hegel's doctrine of mediation. While the formulation itself is absent, the idea is clearly there in an entry from the *Journal EE* in 1838.<sup>147</sup> Moreover, the Latin formulation, albeit not in any polemical context, appears in his dissertation *The Concept of Irony* which was of course completed immediately before his trip to Berlin.<sup>148</sup> It is thus clear that Kierkegaard was familiar with this slogan and its meaning before he attended Werder's lectures. Yet it was not until his stay in Berlin that he formulated and began work on *Either/Or*, and for this reason it seems that Werder must be privileged, if not as the original source, then as the proximate source for Kierkegaard's use of it. Although Werder's book does not reach the section in Hegel's *Wissenschaft der Logik* where the laws of classical logic are criticized,<sup>149</sup> he uses the formulation "either/or" in a polemical manner in other contexts.

It will be recalled that Werder wrote his *Habilitation* on Plato's dia-

<sup>145</sup> Johan Ludvig Heiberg, "En logisk Bemærkning i Anledning af H. H. Biskop Dr. Mynsters Aftandling om Rationalisme og Supranaturalisme i forrige Hefte af dette Tidsskrift," *Tidsskrift for Litteratur og Kritik*, vol. 1, 1839, p. 444. <sup>147</sup> *JP*, vol. 2, 1578; *SKS*, vol. 18, pp. 34f, EE:93: "All relative contrasts can be mediated; we do not really need Hegel for this, inasmuch as the ancients point out that they can be distinguished. Personality will for all eternity protest against the idea that absolute contrasts can be mediated (and this protest is incommensurable with the assertion of mediation); for all eternity it will repeat its immortal dilemma: to be or not to be—that is the question (Hamlet)."

<sup>148</sup> *CL*, p. 8; *SKS*, vol. 1, p. 139: "On the front of the stage, then is Socrates—not as someone who rashly brushes away the thought of death and clings anxiously to life, nor as someone who takes eagerly goes toward death and magnanimously sacrifices his life; not as someone who takes delight in the alteration of light and shadow found in the syllogistic *aut/aut* when it almost simultaneously manifests broad daylight and pitch darkness, manifests the infinitely real and the infinitely nothing." *CL*, pp. 82–83; *SKS*, vol. 1, p. 140: "At the end of the *Apology*, however, an attempt is made to show that to die is a good. But this observation is once again an *aut/aut*, and since the view that death is nothing whatever emerges in conjunction with the one *aut*, the extent to which one can share the joy that encircles both these continents like the ocean becomes somewhat doubtful."

<sup>149</sup> I.e., the second chapter of the first section of "The Doctrine of Essence." Hegel, *SL*, pp. 408–443; *Jub*, vol. 4, pp. 504–551. See also *EL*, §§ 115–120; *Jub*, vol. 8, pp. 267–281.

gue, the *Parmenides*, which Hegel had hailed as a masterpiece of dialectical argumentation.<sup>150</sup> In one passage from his *Logik*, Werder quotes a rather large section of the dialogue.<sup>151</sup> A part of this quotation reads as follows: "But there is no time during which a thing can be at once neither in motion nor at rest."<sup>152</sup> This is a typical formulation of the law of excluded middle, which states that a thing must have either the predicate P or not-P, but not both. Thus, a given rose must be either red or not red. In a footnote to this quotation, Werder writes, "Das fixirte Entweder oder das fixirte Oder ist der Charakter der Endlichkeit."<sup>153</sup> By this he seems to mean, with Hegel, that the kind of thinking characterized by this kind of "either/or" constitutes the finite understanding; speculative thought, by contrast, is infinite since it forms a circle of concepts, without stopping at any particular one.

On the next page Werder, still quoting Plato, speaks not only of the "either/or" but also of the "neither/nor." Here he cites the following from the *Parmenides*: "it [sc. the moment] occupies no time in making it [sc. the transition from a state of rest to a state of motion] and at that moment it cannot be either in motion or at rest."<sup>154</sup> Werder's comment on this is the following: "Dies Weder-Noch ist das absolute Entweder-Oder, die Mitte des Begriffes, die ewige Grenze."<sup>155</sup> Here the formulation "neither/nor" is applied to the Platonic concept of the moment, which is neither in motion nor at rest. The moment itself is not in motion when it is taken as an isolated entity; however, a series of moments is clearly in motion. It might be argued that these formulations have a relatively minor significance since they appear as footnotes, which Werder uses to comment on

<sup>150</sup> Hegel, *Hist. of Phil.*, vol. 1, p. 250; *Jub*, vol. 17, p. 308: "Plato, in one of his dialogues, likewise accords the chief part to Parmenides, and puts in his mouth the most lofty dialectic that was ever given ..." See also Hegel, *SL*, pp. 55f; *Jub*, vol. 4, p. 53: "That which enables the Notion to advance itself is the already mentioned *negativum* which it possesses within itself, it is this which constitutes the genuine dialectical element. Dialectic in this way acquires an entirely different significance from what it had when it was considered as a separate part of logic and when its aim and standpoint were, one may say, completely misunderstood. Even the *Platonic* dialectic, in the *Parmenides* itself and elsewhere more directly, on the one hand, aims only at abolishing and refuting limited assertions through themselves, and, on the other hand, has for result simply nothingness."

<sup>151</sup> Plato, *Parmenides*, 155e–157b. In English translation: *Parmenides*, trans. by E. M. Ford, in *The Collected Dialogues of Plato*, ed. by Edith Hamilton and Huntington Cairns, Princeton University Press 1961, pp. 947–948.

<sup>152</sup> Plato, *Parmenides*, 156c. In English translation: *Parmenides*, op. cit., p. 947.

quoted material from Plato. However, these formulations appear again later in different contexts.

Werder continues this proliferation of odd formulations by introducing the “both/and” later in the work. Discussing the concepts of something and other, he writes:

Hier aber galt es zu vergessen, Welch ein Gepräge Etwas und Anderes und Weder-Noch und Sowo[h]-Als auch im *Venkehr* der Sinnlichkeit empfangen haben; darauf kam es an, um *ihrer* Erinnerung bewußt zu werden. Die Veränderung als das Weder-Noch des nur Etwas und des nur Andern ist ihr Sowo[h]-Als auch, ist die Einheit beider.<sup>156</sup>

The point here is much the same as before. The problem is how to explain change. First, a given thing must display some new aspect or property for change to have been said to take place at all. The assertion that a thing always remains itself appears to rule out the possibility of change. However, when a given thing changes it does not simply become something else since then it would not be the same thing that changed. Thus, change is likewise not simply the introduction of something else. Change thus requires a thing to be “both” itself “and” the thing it changes into. Everything that changes has first an aspect of self-identity, i.e., it must be the same thing that experiences change, and then an aspect of difference, i.e., it must display some new aspect in order for change to be said to have taken place. The both/and is the unity of these two aspects.

Werder avails himself of the same formulations a few pages later in his discussion of finitude and infinity. There he writes,

Des Endlichen Offenbarung ist die Offenbarung des Unendlichen, und nur diese gedoppelte Erklärung ist es, die wir die Verklärung nennen. Offenbarung ist Verklärung. Beides ist nur der concrete Ausdruck für jenes absolute Sowo[h]-Als auch, das wir in negativer Weise bei der Auflösung der Veränderung schon kennen gelernt haben und das einzige und allein als Weder-Noch die sich affirmirende Affirmation ist, die ewige Einheit des lebendig-Unveränderlichen oder des offenbar-Unendlichen.<sup>157</sup>

This is a difficult passage, full of wordplays. The point seems to be that it

<sup>156.</sup> Werder, *Logik*, p. 156.

<sup>157.</sup> Werder, *Logik*, p. 160.

is a mistake to think of finite things just as finite things. They are instead the incarnation or revelation of the infinite since the infinite expresses itself concretely in finite things. One must be attentive enough to recognize the infinite in the finite. In this way a given thing is “both/and,” i.e., both finite and infinite. In the background of the discussion is clearly the Christian Revelation as evidenced by the theological language of the wordplay that *Erklärung* (explanation) is *Verklärung* (transfiguration). Thus, Christ is both finite, i.e., a human being, and infinite, the divine. Needless to say, this is a highly significant issue for Kierkegaard in a number of different texts. It is obvious that he would be highly attentive to it here given that he was explicitly looking for things from Werder’s logic which he could use in a dogmatics.<sup>158</sup>

Here one can see Werder’s love for catchy formulations such as either/or, both/and, and neither/nor. While Hegel uses formulations of this sort occasionally, he does not do so with such frequency and certainly not with precisely these formulations. Only the expression “either/or” is used by Hegel with any frequency, and its meaning is considerably more limited than in Werder’s discussion. Thus, it is highly probable that Werder’s playful use of these formulations helped to inspire Kierkegaard in selecting the title for the work that he himself designates as the beginning of his authorship.<sup>159</sup>

### B. The Moment

The “moment,” sometimes translated as “the instant,” is a key concept in Kierkegaard’s *œuvre*. Many commentators have assumed that he adopted it directly from the *Parmenides* where it was introduced and discussed by Plato.<sup>160</sup> Yet Werder, whose *Habilitation* had been on that very dialogue, shared Kierkegaard’s interest in Plato, and it is reasonable to assume

<sup>158.</sup> *JP*, vol. 1, 257; *SKS*, vol. 19, Not850, p. 245.

Widenmann, “Plato and Kierkegaard’s ‘Moment,’” in *Faith Knowledge and Action*, ed. by George L. Stengren. Copenhagen: C. A. Reitzels 1984, pp. 251–256.

that Kierkegaard, who had just completed his master's thesis on Socratic irony, would have been attentive to Werder's views on the subject. While there is no reason to doubt that Kierkegaard was familiar with this concept in Plato's dialogue, it may have been Werder who first brought its full philosophical and theological implications to his attention.<sup>161</sup>

In the passage mentioned in the previous subsection, Werder quotes from the *Parmenides* at length.<sup>162</sup> There he quotes the following discussion of the moment from Plato:

The word "moment" appears to mean something such that *from it* a thing passes to one or other of the two conditions [sc. being at motion or at rest]. There is no transition *from* a state of rest so long as the thing is still at rest, nor *from* motion so long as it is still in motion, but this queer thing, the moment, is situated between the motion and the rest; it occupies no time at all, and the transition of the moving thing to the state of rest, or of the stationary thing to being in motion, takes place *to and from* the instant.<sup>163</sup>

A few pages later, Werder refers to the concept of the moment again in a discussion of coming-to-be and ceasing-to-be, the constituent parts of the category of becoming. He writes,

Soll die Sache in ihrer Tiefe ergriffen werden, so muß es folgendermaßen geschehn: Werden ist Entstehen und Vergehen – denn es ist Seyn durch sich selber, das heißt Entstehen, Entstehen als unendliches als alles Entstehen, als logischer Geist des Entstehens aufgefaßt, wie es hier aufgefaßt werden muß. Und es ist Vergehen, denn es ist nichts als *Übergehn* (Platons "Augenblick").<sup>164</sup>

Here one finds the wordplay between ceasing-to-be (*Vergehen*) and transition (*Übergehen*) that Kierkegaard notes above. This is significant since

<sup>161.</sup> The claim that Werder is one of the sources for Kierkegaard's concept of the moment has been made briefly by Klaus Schäfer, *Hermeneutische Ontologie in den Climaclus-Schriften Sören Kierkegaards*, Munich: Kösel-Verlag 1968, p. 295, note 202. See also p. 259, note 130, and pp. 142–144.

<sup>162.</sup> Werder, *Logik*, pp. 93–96.

<sup>163.</sup> Plato, *Parmenides*, 150d–e. In English translation: *Parmenides*, op. cit., p. 947. Translation slightly modified. Quoted by Werder in *Logik*, p. 95.

<sup>164.</sup> Werder, *Logik*, p. 100.

Kierkegaard notes precisely this transition<sup>165</sup> and precisely this word-play.<sup>166</sup> Most importantly, the understanding of the moment as transition (*Übergehen*) is precisely the point that Kierkegaard makes about this concept. Later, in *The Concept of Anxiety* he writes explicitly, "the moment becomes the category of transition."<sup>167</sup>

As a part of the same analysis, Werder continues his wordplays, this time with the German word for "the moment." He writes,

Nur ehe des Werdens ewiges Aug' blickt aus dem Nichts – und dies ehe gilt nur für den endlichen Geist, den lernenden – mag Nichts heißen: Nichts Anderes; aber als Nichts Anderes heißt es ja nur: Nichts Anderes als *Seyn*, nur *Seyn*, nur *Werden*. So heißt es vielmehr und einzig und allein: *Nichts als Werden* – das ist: Vergehn. Sich wandeln, *wandeln in sich*, das heißt Vergehen – das heißt Entstehen, heißt Werden, der Inbegriff des Wandels, der ewige Wandel, das Übergehn.<sup>168</sup>

Here Werder makes more or less the same point, again referring to the moment as a transition (*Übergehen*). However, the first sentence, where instead of writing the German word for "the moment," i.e., "Augenblick," he uses a somewhat poetic verbal construction, which recalls the etymology of the word as "a twinkling of an eye": "Nur ehe des Werdens ewiges Aug' blickt aus dem Nichts," i.e., "Before the eternal eye of becoming looks out of the nothing..." It is clear that Kierkegaard would have been attentive to this kind of a formulation.

In another passage towards the end of his analysis, Werder speaks for the first time of "moments" in the plural form. He here makes a point about the nature of dialectical opposites, indicating one sense of the German word "Moment." He writes,

Nimmt man hingegen Momente in der Bedeutung von Schöpfungs-momenten, von *Augenblicken*, in denen die Totalität, das Unendliche – denn nur die Totalität ist oder Alles und Jedes ist nur als Totalität, als Unendlichkeit – sich erblickt, so ist der Ausdruck allerdings – der eigent-

<sup>168.</sup> Werder, *Logik*, pp. 102f.

lich bezeichnende für Entgegengesetzte, d.h. für die Totalität in ihrem Lebensprozesse.<sup>169</sup>

Here Werder emphasizes the word "Augenblicken" to indicate that he is using it in the technical sense as before. He contrasts the notion of dialectical "moments" (*Momente*) or contradictory aspects of a thing with "moments" (*Augenblicke*) in the temporal or Platonic sense, a distinction which unfortunately cannot be rendered adequately in English. In any case, there can be no doubt that this is a key concept for Werder which he has carried over from his work on the *Parmenides*.

While Kierkegaard alludes to the *Parmenides* in *The Concept of Irony*,<sup>170</sup> i.e., prior to attending Werder's lectures, there is no mention of the concept of the moment until after them. In fact, the first mention of this concept appears in *Either/Or*, which he in large part wrote while attending the lectures. In *Either/Or* in the context of a discussion about the moment of choice,<sup>171</sup> he has Judge Wilhelm write, "This is the moment of deliberation, but, like the Platonic moment, it actually is not at all, and least of all in the abstract sense in which you wish to hold onto it; and the longer one stares at it, the smaller it is."<sup>172</sup> Plato's concept is thus used and emphasized by Kierkegaard exactly as it had been used and emphasized by Werder. Later in the same work the moment is brought into the discussion of speculative mediation,<sup>173</sup> where it continued to play a central role in later works. Later in *Repetition* Kierkegaard writes, "The Greek explanation of the theory of being and nothing, the explanation of 'the moment,' 'non-being,' etc. trumps Hegel."<sup>174</sup> The passage appears in a discussion of change, the same context in which both Plato and Werder treat this concept. However, as in *Either/Or*, Kierkegaard again juxtaposes the concept to Hegelian mediation, a move which again implies Werder's influence.<sup>175</sup>

<sup>172.</sup> EO2, p. 163; SKS, vol. 3, p. 160.

<sup>173.</sup> EO2, p. 173; SKS, vol. 3, p. 169.

<sup>174.</sup> R, pp. 148f; SKS, vol. 4, p. 25. Cf. Werder, *Logik*, pp. 80f, where Werder quotes Hegel on the Eleatics.

<sup>175.</sup> Another detailed treatment of this concept appears in the *Philosophical Fragments*. Here the moment is treated as the moment of the incarnation when the god became man, the

Kierkegaard's main discussion of this concept comes in *The Concept of Anxiety*,<sup>176</sup> in which his pseudonymous author polemizes against the Hegelian concepts of transition, negation and mediation, which are, of course, of central importance for Hegel's conception of speculative logic.<sup>177</sup> It will be recalled that Werder frequently uses the term "transition" (*Übergehen*) in the passages quoted above in his description of the dialectical relation to the categories. Kierkegaard then has Virgilius Hauffniensis juxtapose these concepts to Plato's notion of "the moment":

The term "transition" is and remains a clever turn in logic. Transition belongs in the sphere of historical freedom, for transition is a state and is actual. Plato fully recognized the difficulty of placing transition in the realm of the purely metaphysical, and for that reason the category of *the moment* cost him so much effort. To ignore the difficulty certainly is not to "go further" than Plato.<sup>178</sup>

This reference to "the moment" is supplemented by a long footnote with a detailed discussion of this concept in the *Parmenides*. In this footnote it becomes clear why Kierkegaard places so much emphasis on this concept. He has his pseudonym write: "This category [sc. the moment] is of utmost importance in maintaining the distinction between Christianity and pagan philosophy, as well as the equally pagan speculation in Christianity."<sup>179</sup> It will be recalled that much of Kierkegaard's polemical rhetoric against philosophy concerns the untoward encroachment of philosophical thinking into areas of religion. The footnote goes on to explain why he thinks the concept of the moment can perform this function:

Here again the importance of the moment becomes apparent, because only with this category is it possible to give eternity its proper significance.

<sup>176.</sup> Werder became temporal. E.g., PE, pp. 13–22; SKS, vol. 4, pp. 222–230. PE, p. 25; SKS, vol. 4, p. 232. PE, p. 28; SKS, vol. 4, p. 235. PE, pp. 30–31; SKS, vol. 4, p. 237. PE, p. iii; SKS, vol. 4, p. 306. Here the moment is associated with the paradox: PE, pp. 51–52; SKS, vol. 4, pp. 253–256. PE, p. 55; SKS, vol. 4, p. 258. PE, pp. 58–59; SKS, vol. 4, pp. 260–261. PE, pp. 62–64; SKS, vol. 4, pp. 264–266.

<sup>177.</sup> CA, pp. 82–93; SKS, vol. 4, pp. 385–396. See also JP, vol. 3, 2740; PP, V B 55, 6. PP, V B 72, 16. See also the allusion to the Platonic moment and the leap: JP, vol. 3, 2345; PP, V C 1, p. 371.

<sup>178.</sup> CA, pp. 82–83; SKS, vol. 4, pp. 385–386.

<sup>179.</sup> CA, p. 84n.; SKS, vol. 4, p. 387n.

ce, for eternity and the moment become the extreme opposites, whereas dialectical sorcery, on the other hand, makes eternity and the moment signify the same thing.<sup>180</sup>

The idea seems to be that the concept of the moment maintains the essential opposition of eternity and temporality. How this opposition is overcome in the incarnation is simply a paradox which cannot be understood. Kierkegaard opposes speculative philosophy's claim that the eternal and the temporal, or the eternal and the single moment are simply dialectical opposites which display a conceptual unity. This seems to be what Kierkegaard most violently objects to. He finds dialectical meditation of the two opposites inappropriate because it confuses the essential distinction between Christianity and secular philosophy. Needless to say this is far removed from the original context of this concept in Plato or later in Werder.

It has been noted that Hegel lauds the *Parmenides* for its dialectical argumentation. It is also in this sense that Werder makes use of it, i.e., to illustrate the speculative nature of logic. Specifically the paradoxical nature of the moment as being both in motion and at rest is intended to demonstrate the limitations of traditional logic and the need for speculative logic. It is thus curious to observe that when Kierkegaard uses this concept it is not to support speculative logic but instead to criticize it. As was noted above, he favorably compares this concept to the notion of mediation or transition in Hegel's speculative logic. Kierkegaard thus uses the Platonic concept not as an indication of the need for a speculative logic but rather as designation of the limit of reason *per se*. This indicates a fundamental disagreement between Hegel and Kierkegaard. For Hegel, the paradox of the moment is a call for a new conception of logic as speculative, whereas for Kierkegaard it indicates that all attempts to grasp such a concept with reason must fail. He is thus critical of speculative logic which he regards as a failed attempt to solve with reason what in principle cannot be resolved. This is why he seems in some passages to regard speculative logic straightforwardly as sleight of hand. In this way Kierkegaard can regard himself as being genuinely Socratic in the sense of claiming to know nothing and ending in *aporia*, in contrast to Hegelian

philosophy which takes up the challenge generated by the paradoxical concept and attempts to work out a logic more suited to it than classical logic.

Given the chronology of Kierkegaard's references to this concept, it seems to have been Werder who first made him aware of it in Plato. Kierkegaard himself then went on to develop it and use it in his own way in the mature authorship. The original concept in Plato is clearly philosophical and, for obvious reasons, has nothing to do with Christian dogmatics. Likewise, Werder uses this concept in order to illustrate the categories of coming-to-be and ceasing-to-be and in order to highlight the methodology of speculative logic in general. While Kierkegaard is of course sensitive to these original contexts, he invariably makes use of the concept in a profoundly theological context. This is clear in, for example, the passages discussed from *The Concept of Anxiety*, where Haufniensis begins with a discussion of the moment specifically in Plato's *Parmenides* and ends with the claim (one quite foreign to Plato) that the moment "is of utmost importance in maintaining the distinction between Christianity and pagan philosophy."<sup>181</sup> Thus, Kierkegaard's interest in Werder's lectures appears to have been stimulated, at least in part, by a search for ideas he could apply in furthering his own agenda in the context of a dogmatics.

The difficulty of Kierkegaard's notes to Werder's lectures and the other entries in which he is mentioned has discouraged research into this relation. However, a simple prejudice about Kierkegaard's presumed negative relation to any Hegelian doubtless also played a role. Given the general view of Thulstrup, i.e., that Kierkegaard was in a constant polemic with Hegel and Hegelians and that he wholeheartedly rejected anything having to do with Hegel's philosophy, one could hardly have any great motivation to explore the entries on Werder examined here. To be sure, in Kierkegaard's universe of thought Karl Werder was only a minor constellation in comparison with, for example, Hegel or Schelling. Despite this there are at least hints of a more lasting influence of Werder on Kierkegaard. Moreover, that influence seems to be far more positive than Thulstrup would like to admit.

<sup>180.</sup> CA, p. 84n.; SKS, vol. 4, pp. 387n.-388n.

<sup>181.</sup> CA, p. 84n.; SKS, vol. 4, p. 387n.

The original question of why Kierkegaard was interested in attending Werder's lectures finds its answer in the analyses above which indicated his interest in using the categories for logic as they were relevant for dogmatics. This is wholly in line with his later use of them in works such as *Philosophical Fragments* and *The Concept of Anxiety*. This insight helps to shed light on an old question that has periodically exercised Kierkegaard research, namely, to what degree, if at all, was Kierkegaard a philosopher.<sup>182</sup> During the hegemony of analytic philosophy, he was regarded with grave suspicion among mainstream Anglo-American philosophers. He was considered guilty by his association with the French and German existentialist thinkers, who were dismissed as artists or writers and not philosophers. This has continued to be a topic of interest to more recent Kierkegaard research, which has been anxious to rehabilitate him and cast him in the role of a true philosopher in every sense of the word. However, the analysis presented here makes clear that Kierkegaard's interest in Werder's lectures was not in the first line philosophical. He was not interested in Werder's discussion of the categories for their own sake or in terms of their significance for the history of philosophy. Instead, he was interested in them only as they applied to theology, specifically dogmatics. Here we see a fairly common case of a theologian using philosophy for his own purposes. This seems to undermine the claim that Kierkegaard, at least at this at this early stage, was primarily a philosopher.
